INDEX

Ablashi, D. V., 263, 397
Abramoff, Peter, 1058
Abstracts of papers presented at the United States-Japan complement seminar, Tokyo, Japan, November 11–13, 1968, 1336
Adjuvant (*see* Enhancement)
Adoptive immunization: refractory period in adoptive immunization after secondary stimulation, 375
Adsorption (*see* Immunoadsorption)
Adults (*see also* Children *and* Elderly persons)
  effects of single low antigen doses on immunologic responsiveness in adult, 100
  extracellular esterases of streptococci and the distribution of specific antibodies in human sera of various age groups, 859
  unresponsiveness in adult: induction of unresponsiveness with aggregated serum proteins, 1163
Agar (*see* Antigen-antibody reactions in agar)
Agglutination (*see* Hemagglutination)
Aggregated serum protein: unresponsiveness in adult: induction of unresponsiveness with aggregated serum proteins, 1163
Airhart, Jim W., 1220, 1227
Alberti, Humberto, 42
Albumin (*see* Serum)
Alimentary tract: distribution of poliovirus antibody in serum, nasopharynx and alimentary tract following segmental immunization of lower alimentary tract with poliovaccine, 1423
Alkylation: physicochemical properties of reaginic antibodies: effect of reduction and alkylation on γE antibodies, 69
Allansmith, M., 1504
Allantoic fluid: quantitative precipitin analysis of influenza virus host antigen and of sulfated mucopolysaccharides of embryonic allantoic fluid, 1144
Allen, Nancy K., 1295
Allergic encephalomyelitis (*see* Encephalomyelitis)
Alloantibodies: availability of transplantation alloantigens to circulating antibodies: studies with alloantibodies of known specificity, 1373
Alloantigens: availability of transplantation alloantigens to circulating antibodies: studies with alloantibodies of known specificity, 1373
Allotypes
  allotypic antigen of colostral λA immunoglobulin, 1156
  comparison of Aa1 specificity carried by IgG and IgM, 1368
  identification and genetic control of three γA immunoglobulin allotypes, 544
  light chains lacking b-allotypic specificities: isolation and characterization from normal and allotype suppressed homozygotes, 638
Anamnestic response
  characterization of IgM and IgG antibodies produced during anamnestic response initiated *in vitro*, 317
  cytokinetics of appearance of hemolysin-forming cells in infected mice during anamnestic response to sheep erythrocytes, 338
  stimulation of anamnestic antibody *in vitro*, 306
Anaphylaxis
  factors influencing production of early, heat labile anaphylactic antibody, 947
  passive anaphylaxis to endotoxin, 563
  role of fumaropimaric acid in complement dependent and non-complement dependent biologic reactions: inhibition of Forssman, reversed passive Arthus and passive cutaneous anaphylaxis reactions by fumaropimaric acid, 1
Anderson, Truman O., 625
Andersson, Birger, 1309
Animal influenza virus (*see* Influenza virus)
Anthony, Bascom F., 832
Antibody (*see also* specific diseases *and* specific types of antibody)
  acrylamide gel electrophoresis of purified human antibodies and myeloma proteins, their heavy and light chains, 273
  antigen-induced cell proliferation in cultures from antibody-deficient chickens, 1079
  availability of transplantation alloantigens to circulating antibodies: studies with alloantibodies of known specificity, 1373
  cellular and humoral antibody production in splenectomized chicken, 1058
  chromatographic studies on spleen and lymph node extracts with antibody activity, 519
  critical variables of the Jerne plaque technique as applied to antibody-forming systems responding to heterologous red cell antigens, 155
  differentiation of antibody-forming cells: effect of antigen dose on proliferation of precursor cells and plaque-forming cells, 1084
  Do antibody-forming cells circulate in blood?, 1002

effect increased of levels of free antibody on antibody synthesis, 451
effect of 10 kr on antibody synthesis, 442
enhancing antibody: bioassay for normal skin grafts, 507
enrichment of antibody plaque-forming cells by immunoadsorption to an antigen-coated polyurethane foam, 908
heterogeneity of binding of first component of complement as a function of antibody concentration, 1322
histamine release mediated by two classes of antibodies, 327
human antibodies against a new determinant present in blood group substances from hog gastric mucosa, 1363
in rainbow trout complement, 1202
immunocompetent cells in spleen and anterior kidney, 1193
kinetics of development of antibody-producing cells, 1202
natural hemolysin, 1202
in vitro antibody synthesis by diffusion chamber cultures of spleen cells
effect of increased levels of free antibody, 451
methods and effect of 10 kr on antibody synthesis, 442
isoantigens available to circulating antibodies, 283
isologous transfer of antibody formation, 751
isotopic antiglobulin technique for measuring antibodies to cell-surface antigens, 842
Jerne plaque technique applied to antibody-forming systems responding to heterologous red cell antigens, 155
kinetics of development of antibody-producing cells, 1202
mechanism of suppression of active antibody synthesis by passively administered antibody, 37
micro-modification of the Oudin agar gel precipitin method for determination of antibody concentrations in absolute weight units, 1394
procedures to detect primary binding of antigen by antibody, 832
quantitative estimation of antibodies in different immunoglobulin classes, 492
ultrastructure of rosette-forming cells during antibody response, 1474
use of insoluble antibody for quantitation of small amounts of immunoglobulin, 618
Antibody-antigen complexes (*see* Antigen-antibody complexes)
Antigen (*see also* specific diseases *and* specific types of antigen)
antigen-induced cell proliferation in cultures from antibody-deficient chickens, 1079
brain antigens: water soluble antigenic proteins of brain, 877
cytotoxic antiglobulin technique for assay of antibodies to histocompatibility antigens, 140
delayed hypersensitivity: effect of pre-exposure to antigen on macrophage migration, 1074
differentiation of antibody-forming cells: effect of antigen dose on proliferation of precursor cells and plaque-forming cells, 1084
effect of intravenous antigen on circulating monocytes in animals with delayed hypersensitivity, 804
effects of single low antigen doses on immunologic responsiveness in adult, 100
enrichment of antibody plaque-forming cells by immunoadsorption to an antigen-coated polyurethane foam, 908
induction of unresponsiveness: antigen form and mouse strain variation, 389
isotopic antiglobulin technique for measuring antibodies to cell-surface antigens, 842
Jerne plaque technique applied to antibody-forming systems responding to heterologous red cell antigens, 155
of normal and atherosclerotic intima, 1404
procedures to detect primary binding of antigen by antibody, 832
Antigen-antibody complexes
Ca^{++}-dependent binding of antigen-19 S antibody complexes to macrophages, 1172
inhibition of capillary migration by antigen-antibody complexes 404
lysozyme and β-lysin release stimulated by antigen-antibody complexes, 743
Antigen-antibody ratio: density of BAI strain A avian leukosis virus-antibody complexes relative to antigen-antibody ratio, 1326
Antigen-antibody reactions in agar micro-modification of the Oudin agar gel precipitin method for determination of antibody concentrations in absolute weight units, 1394
treatment of antisera and optical densities of precipitin reactions, 1398
Antiglobulin
cytotoxic antiglobulin technique for assay of antibodies to histocompatibility antigens, 140
isotopic antiglobulin technique for measuring antibodies to cell-surface antigens, 842
Anti-immunoglobulin control of immune hemolysis, 1242
Antiluciferase: chromatographic studies on spleen and lymph node extracts with antibody activity, 519
Antilymphocytic serum
cytophilic antibody in heterologous antilympho-

cytic serum: presence, absorption and possible biologic significance, 1329
effect on lymphocytes, 179
effect on reticuloendothelial system, 1498
Antimacrophage sera: *in vitro* and *in vivo* properties, 656
Antisera (*see also* specific diseases)
antigen-antibody reactions in agar: treatment of antisera and optical densities of precipitin reactions, 1398
neutralization of bacteriophage Q β: a mathematical analysis, 206
prevention of death from endotoxin with antisera: risk of fatal anaphylaxis to endotoxin, 563
Arthus reaction: role of fumaropimaric acid in complement dependent and non-complement dependent biologic reactions: inhibition of Forssman, reversed passive Arthus and passive cutaneous anaphylaxis reactions by fumaropimaric acid, 1
Atherosclerotic intima: antigens of normal and atherosclerotic intima, 1404
Attenuated virus (*see* specific diseases)
Austen, K. Frank, 327, 533, 795, 1379
Autoantibodies: characteristics of "natural," 632
Autologous immune complex glomerulonephritis: cellular and parabiotic transfer, 194
Autologous serum: reactivity of lymphocytes to autologous and homologous serum, 1526
Avian leukosis
density of BAI strain A avian leukosis virus-antibody complexes relative to antigen-antibody ratio, 1326
Avidity: immune hemolysis: serial studies on dissociability of IgG and IgM anti-Forssman antibodies by C'1a fixation and transfer technique, 986
Ayoub, Elia M., 698

Bach, Gerhard L., 625
Bacillus Calmette-Guérin: inhibition of macrophage migration by a skin-reactive polysaccharide from BCG culture filtrates, 1466
Bacteria (*see also* specific strains of bacteria)
lysozyme and β-lysin release stimulated by bacteria, 743
Bactericidal reaction: serum bactericidal reaction: antibody and complement requirements for killing a rough *Escherichia coli*, 1379
Bacteriophage
kinetics of neutralization of ϕX 174 by antibodies, 772
neutralization of Q β with antiserum: a mathematical analysis, 206
Baer, Harold, 1466
Barker, Lewellys F., 1529
Basement membrane (*see* Glomerular basement membrane)
Bast, Robert C., Jr., 1163
Bauer, W., 1474
Baum, John, 187
BCG (*see* Bacillus Calmette-Guérin)
Beachey, Edwin H., 42
Becker, Elmer L., 1
Becker, Yechiel, 1290
Benacerraf, Baruj, 513, 804
Benedict, Albert A., 1523
Bennich, Hans, 826, 884
Benson, Lois, 1128
Berger, F. M., 1024
$\beta_{1c/a}$ globulin (*see* Globulin)
β-lysin release stimulated by antigen-antibody complexes and bacteria, 743
Beychok, Sherman, 1354
Binding (*see also* Immunoadsorption)
Ca^{++}-dependent binding of antigen-19 S antibody complexes to macrophages, 1172
comparison of procedures to detect the primary binding of antigen by antibody, 832
Bis-diazotized benzidine: detection of pancreas-specific isoantibodies by bis-diazotized benzidine hemagglutination, 1208
Blastogenesis: mixed lymphocyte blastogenesis in response to multiple histocompatibility antigens, 107
Bloch, Kurt J., 327
Blood (*see also* Erythrocyte)
Do antibody-forming cells circulate in blood?, 1002
effect of isohemagglutinin on course of blood-induced *Plasmodium lophurae* infections, 688
Blood groups
human antibodies against a new determinant present in blood group substances from hog gastric mucosa, 1363
interaction of blood group substances from various sources with a plant lectin, concanavalin A, 1354
isolation and characterization from ovarian cyst fluid of a blood group substance lacking A, B, H, Le^a and Le^b specificity, 821
subtypes of ABO groups and subtype-specific antibodies, 763
Bortin, Mortimer M., 1042
Bovine serum albumin (*see* Serum)
Brain antigens: water soluble antigenic proteins of bovine brain, 877
Braude, Abraham I., 563, 1454
Bredt, Allen B., 1526
Breitenbach, R. P., 688
Briggaman, Robert A., 1179
Brilliantine, Laura, 1295
Brinckerhoff, Constance E., 682, 1208

Brody, Neil I., 37
Bronchitis: neutralizing antibody complex of infectious bronchitis virus, 720
Brown, Kenneth R., 563
Brown, Mickey S., 1411
Brucella abortus: antibody elicited by *B. abortus* antigen *in vitro*: prolonged production by cell susepnsions, 77
Brusenback, R. A., 206
Bryant, Richard E., 241
Burroughs, M. A. K., 397
Bursa
  ontogeny of circulating immunoglobulins in bursectomized chickens, 370
  role of bursa in development of humoral immunological competence, 671
Butterworth, M., 1504

Ca^{++}-dependent binding of antigen-19 S antibody complexes to macrophages, 1172
Cain, W. A., 671
Campbell, Priscilla A., 1084
Cantagalli, P., 24
Capillary migration: inhibition by antigen-antibody complexes, 404
Carbohydrate (*see* Protein-carbohydrate interaction *and Streptococcus*)
Carcinogen: water soluble transplantation antigen from carcinogen-induced sarcomas, 28
Cell (*see also* specific diseases *and* specific cell types)
  antigen-induced cell proliferation in cultures from antibody-deficient chickens, 1079
  immune response: cellular and humoral antibody production in the splenectomized chicken, 1058
Ceglowski, Walter S., 338
Cell migration
  inhibition of *in vitro* cell migration in experimental allergic encephalomyelitis, 1431
  macrophage inhibition test: comparison of the skin and cell migration reactions during the development of delayed hypersensitivity, 852
Cell-surface antigens: isotopic technique for measuring antibodies to, 842
Cerottini, Jean-Charles, 1008
Chambers, V. C., 1193
Chandlee, G. C., 1024
Chang, C. C., 1437
Chang, Henry, 37
Chanock, Robert M., 1109
Chaparas, S. D., 1466
Chemotaxis: neutrophil chemotactic factor from C'5, 93
Chesebro, Bruce, 1064
Children (*see also* Adults *and* Elderly persons)
  antibody responses in children and elderly persons following local or parenteral administration of an inactivated influenza virus vaccine, A_2/Hong Kong/68 variant, 1102
  extracellular esterases of streptococci and the distribution of specific antibodies in human sera of various age groups, 859
Chiller, J. M., 1193, 1202
Chlamydiae: susceptibility of anti-chlamydial IgG antibodies to reduction and alkylation, 1332
Chlorphenesin: effect on immune response, 1024
Choi, Haing U., 1144
Chorioallantoic fluid: quantitative precipitin analysis of influenza virus host antigen and of sulfated mucopolysaccharides of embryonic allantoic fluid, 1144
Choriomeningitis (*see* lymphocytic choriomeningitis virus)
Chromic chloride: passive immune lysis with chromic chloride-treated erythrocytes, 812
Circulating monocytes: effect of intravenous antigen on circulating monocytes in animals with delayed hypersensitivity, 804
Circulation: Do antibody-forming cells circulate in blood?, 1002
Clark, Geoffrey, 117
Cobrotoxin, 1437
Coccidioidin delayed hypersensitivity: skin test and *in vitro* lymphocyte reactivities, 1284
Cold-adapted influenza virus: biologic and immunologic characteristics, 728
Collagen
  characteristics of antigenic moiety of collagen, 919
  hapten-specific insoluble immunoabsorbents prepared from hide powder (collagen), 647
Colley, Daniel G., 107
Colostrum
  a new allotypic antigen of colostral γA immunoglobulin, 1156
  synthesis of secretory IgA: evidence for synthesis as an 11 S dimer, 693
Compatibility (*see* Histocompatibility)
Competence (*see also* Immunocompetent cells)
  induction of tolerance in competent primates, 266
  role of bursa in development of humoral competence, 671
Complement
  abstracts of papers presented at the United States-Japan complement seminar, Tokyo, Japan, November 11–13, 1968, 1336
  C'1a fixation and transfer technique
    effects of ionic strength, temperature and antibody class and avidity, 993
    immune hemolysis: serial studies on dissocia-

bility of IgG and IgM anti-Forssman antibodies, 986
C3 inactivator: hemolytic measurement by inactivation of cell-bound C3, 533
fixation by γ1 and γ2 immunoglobulins, 269
hereditary deficiency of second component of complement, 168
heterogeneity of binding of first component as a function of antibody concentration, 1322
inhibition of lytic effect of guinea pig complement by rabbit complement, 795
in rainbow trout, 1202
neutrophil chemotactic factor from C'5, 93
relationship of hemolytic activity of active C'1s to its *p*-tosyl-L-arginine methyl ester esterase action: a new method of purification and assay, 421
role of fumaropimaric acid in complement dependent and non-complement dependent biologic reactions: inhibition of Forssman, reversed passive Arthus and passive cutaneous anaphylaxis reactions by fumaropimaric acid, 1
serum bactericidal reaction: complement requirements for killing a rough *Escherichia coli*, 1379
Concanavalin A
interaction of blood group substances from various sources with a plant lectin, concanavalin A, 1354
protein-carbohydrate interaction: effect of polysaccharide molecular weight on the concanavalin A-polysaccharide precipitation reaction, 53
Congdon, L. L., 688
Conway, Thomas P., 544
Coons, Albert H., 306, 317
Cooper, M. D., 370, 671
Cord serum: latex reagent for determining IgM levels in, 679
Coronaviruses: antigenic relationships among coronaviruses of man and between human and animal coronaviruses, 1109
Cortisol acetate: wasting disease induced with, 963
Costea, Nicolas, 488
Couch, Robert B., 530
Craig, Charles P., 1220, 1227
Cremer, Natalie E., 1345
Cross-reactivity between *Streptococcus bovis*, strain S19, and Group A streptococcal carbohydrates, 870
Cryoglobulin: characterization, 476
Cryoprecipitation: characterization of cryoglobulin, 476
Cudkowicz, Gustavo, 1373
Cunningham, C. H., 720
Cure, Susan F., 1345
Cyanin: immune response of mice to keyhole limpet hemocyanin bound to macrophages, 893
Cyst: blood groups: isolation and characterization from ovarian cyst fluid of a blood group substance lacking A, B, H, Le^a and Le^b specificity, 821
Cytomegalovirus: preparation of rabbit immune serum with neutralizing activity against a simian cytomegalovirus (SA6), 263
Cytophilic antibody in heterologous antilymphocytic serum: presence, absorption and possible biologic significance, 1329
Cytoplasmic antigen: characterization of a soluble cytoplasmic antigen reactive with sera from patients with systemic lupus erythematosus, 117
Cytotoxicity
cytotoxic antiglobulin technique for assay of antibodies to histocompatibility antigens, 140
lymphocyte *in vitro* cytotoxicity: mechanism of lymphotoxin-induced target cell destruction, 911

Dajani, Adnan S., 698
Daly, J. J., 1214
Davis, Charles E., 563
Davis, David L., 519
DEAE-dextran: effect of diethylaminoethyl dextran on interferon production and protective effect in mice treated with the double-stranded polynucleotide complex polyinosinic-polycytidylic acid, 24
DeAngelo, M., 1024
Dedrick, Claire T., 852
Deerhake, Beverly B., 431
Deinhardt, Friedrich, 1093
Delayed hypersensitivity
coccidioidin delayed hypersensitivity: skin test and *in vitro* lymphocyte reactivities, 1284
effect of intravenous antigen on circulating monocytes in animals with delayed hypersensitivity, 804
effect of pre-exposure to antigen on macrophage migration, 1074
inhibition of macrophage migration by a skin-reactive polysaccharide from bacillus Calmette-Guérin culture filtrates, 1466
local plasmacytopoiesis in delayed hypersensitivity reactions, 1214
macrophage inhibition test: comparison of the skin and cell migration reactions during the development of delayed hypersensitivity, 852
to purified streptococcal M protein, 42
Dengue shock syndrome: anti-dengue immuno-

globulins and serum $\beta_{1c/a}$ globulin levels in dengue shock syndrome, 412
Deoxyribonucleic acid-binding assay for detection of anti-DNA antibodies, 788
Des Prez, Roger M., 241
Deutsch, Alice, 37
DeWitt, Charles W., 107
Dextran (*see* diethylaminoethyl dextran)
Dianzani, F., 24
Diethylaminoethyl dextran: effect of diethylaminoethyl dextran on interferon production and protective effect in mice treated with the double-stranded polynucleotide complex polyinosinic-polycytidylic acid, 24
Differentiation of antibody-forming cells: effect of antigen dose on proliferation of precursor cells and plaque-forming cells, 1084
Diffusion chamber: *in vitro* antibody synthesis by diffusion chamber cultures of spleen cells
effect of increased levels of free antibody, 451
methods and effect of 10 kr on antibody synthesis, 442
Diggs, Carter L., 292
Dinitrophenyl poly-L-lysine: tolerance in the dinitrophenyl poly-L-lysine immune system, 513
Disulfide bonds: presence of L-L interchain disulfide bonds in reconstituted γG molecules, 848
Dixon, Frank J., 194, 1008
DNA: deoxyribonucleic acid-binding assay for detection of anti-DNA antibodies, 788
Donald, David H., 519
Donaldson, David M., 743
Dorner, Marianne M., 273
Dosage: effects of single low antigen doses on immunologic responsiveness in adult rabbit, 100
Dossett, John H., 1235
Dougherty, Suanne F., 266
Douglas, Herndon, 563
Dowdle, Walter R., 956
Dray, Sheldon, 544
Drescher, Joachim, 1050
Dvorak, Harold F., 1163

Ebert, Donna S., 1411
Eckert, Edward A., 1105
Edgington, T. S., 194
Ehnholm, C., 763
Einstein, Elizabeth Roboz, 1431
Elderly persons (*see also* Adults *and* Children)
antibody responses in children and elderly persons following local or parenteral administration of an inactivated influenza virus vaccine, A_2/Hong Kong/68 variant, 1102
antibody responses in nasal secretions and serum of elderly persons following local or parenteral administration of inactivated influenza virus vaccine, 555
Elliott, J. H., 1214
Embryonic allantoic fluid: quantitative precipitin analysis of sulfated mucopolysaccharides, 1144
Encephalitis
alterations in immune responses by attenuated Venezuelan equine encephalitis vaccine
adjuvant effect of Venezuelan equine encephalitis virus infection in guinea pigs, 1227
pathology and soluble antigen localization in guinea pigs, 1220
relationship between viremia and interferon production of Japanese encephalitis virus, 662
response to altered encephalitogenic protein, 381
Encephalomyelitis
facilitatory and inhibitory effects of phytohemagglutinin on experimental allergic encephalomyelitis, 63
inhibition of *in vitro* cell migration in experimental allergic encephalomyelitis, 1411
Endotoxin
endotoxin-induced modification of *Plasmodium berghei* infection, 131
prevention of death from endotoxin with antisera: risk of fatal anaphylaxis to endotoxin, 563
Enhancement
adjuvant effect of powdered ferric oxide: enhancement of response to *Mycoplasma pneumoniae* and respiratory syncytial virus vaccines, 1300
of antibody formation by *Escherichia coli* lipopolysaccharide and detoxified derivatives, 1411
Enhancing antibody: bioassay for normal skin grafts, 507
Environment: influence on immunoglobulin levels, 1504
Erythrocytes
critical variables of the Jerne plaque technique as applied to antibody-forming systems responding to heterologous red cell antigens, 155
cytokinetics of appearance of hemolysin-forming cells in infected mice during the anamnestic response to sheep erythrocytes, 338
Membranes: hemoglobin-free erythrocyte membranes, 573
hemoglobin-free erythrocyte membranes, 573
immunologic memory of LAF_1 mice after a single injection of sheep red cells, 288
Jerne plaque technique applied to antibody-

forming systems responding to heterologous red cell antigens, 155
passive immune lysis with chromic chloride-treated erythrocytes, 812
Escherichia coli
enhancement of antibody formation by *E. coli* lipopolysaccharide and detoxified derivatives, 1411
serum bactericidal reaction: antibody and complement requirements for killing a rough *E. coli*, 1379
Esterase
extracellular esterases of streptococci and the distribution of specific antibodies in human sera of various age groups, 859
relationship of the hemolytic activity of active C'1s to its *p*-tosyl-L-arginine methyl ester esterase action: a new method of purification and assay, 421
Evans, Warren H., 899, 908
Everett, N. B., 179
Experimental allergic encephalomyelitis (*see* Encephalomyelitis)

Fahey, John L., 618
Farmer, J. N., 688
Farr, Richard S., 832
Fass, Leroy, 140
Faulk, W. Page, 812
Fc fragment
cleavage of the Fc fragment of IgA, 488
unusual conditions for crystallization of the Fc fragment of IgG, 1523
Ferric oxide: adjuvant effect of powdered ferric oxide: enhancement of response to *Mycoplasma pneumoniae* and respiratory syncytial virus vaccine, 1300
Fedson, David S., 1102
Feingold, David S., 1379
Feldman, Joseph D., 507
Ferraresi, R. W., 852
Fitch, Frank W., 1002
Fitzpatrick, James R., 1102
Fixation (*see* Complement)
Flax, M. H., 1214
Fliedner, T. M., 1474
Foam (*see* Polyurethane foam)
Foot-and-mouth disease: immune response to different serotype antigens in monovalent and trivalent foot-and-mouth disease vaccines, 58
Formaldehyde: antigenicity of formaldehyde- and glutaraldehyde-treated serum albumin and ovalbumin-serum albumin conjugate, 457
Forssman
immune hemolysis: serial studies on dissociability of IgG and IgM anti-Forssman antibodies by C'1a fixation and transfer technique, 986
role of fumaropimaric acid in complement dependent and non-complement dependent biologic reactions: inhibition of Forssman, reversed passive Arthus and passive cutaneous anaphylaxis reactions by fumaropimaric acid, 1
Fox, Eugene N., 970
Free λ chain of immunoglobulin produced by established cell line of myeloma cell origin, 1136
Freeman, M. J., 713
Frenkel, Eugene P., 187
Friedman, Herman, 338
Fuccillo, David A., 679
Fudenberg, H. Hugh, 404, 812
Fukui, G. M., 1024
Fulk, Robert V., 530, 555, 1102
Fumaropimaric acid: role in complement dependent and non-complement dependent biologic reactions: inhibition of Forssman, reversed passive Arthus and passive cutaneous anaphylaxis reactions by fumaropimaric acid, 1

Gagnoni, S., 24
γD myeloma protein: lack of skin-sensitizing property, 790
Gary, G. W., Jr., 656
Gastric mucosa: human antibodies against a new determinant present in blood group substances from hog gastric mucosa, 1363
Gehle, Warren D., 1529
Gel precipitin method: a micro-modification of the Oudin agar gel precipitin method for the determination of antibody concentrations in absolute weight units, 1394
Genetics (*see also* Heredity)
genetic antigens: delineation of two antigenic markers related to genetic antigens of γ globulin, 611
genetic control of three γA immunoglobulin allotypes, 544
Gengozian, N., 155
Gigli, Irma, 795
Gilden, R. V., 263
Glassock, Richard J., 194
Globulin (*see also* Antiglobulin *and* Immunoglobulin)
$\beta_{1c/1a}$ globulin levels and anti-dengue immunoglobulins in dengue shock syndrome, 412
cryoprecipitation: characterization of a cryoglobulin, 476
γ globulin
delineation of two antigenic markers related to the genetic antigens of γ globulin, 611
induction of tolerance to γ-globulin by injec-

tion of antigen into intact organs *in vitro*, 347
use of thymectomized, irradiated rats to study immunogenicity of γ globulin, 925
γE
comparative antigenic study of γE-globulin and myeloma-IgND, 826
physicochemical properties of reaginic antibodies: effect of reduction and alkylation on γE antibodies, 69
γG: presence of L-L interchain disulfide bonds in reconstituted γG molecules, 848
γM
molecular heterogeneity of immunoglobulin-M (γM-globulin), 496
specificity of a monoclonal macroglobulin (γM) antibody: reactivity with primate γG immunoglobulins, 222
Glomerular basement membrane: glycoprotein that induces nephrotoxic antibody: its isolation and purification from glomerular basement membrane, 593
Glomerulonephritis: autologous immune complex glomerulonephritis: cellular and parabiotic transfer, 194
Glovsky, M. Michael, 1
Glutaraldehyde: antigenicity of formaldehyde- and glutaraldehyde-treated serum albumin and ovalbumin-serum albumin conjugate, 457
Glycoprotein that induces nephrotoxic antibody: isolation and purification from glomerular basement membrane, 593
Godfrey, Henry P., 317, 1466
Goihman-Yahr, M., 852
Goldenbaum, E. G., 1024
Goldman, John N., 1379
Goldstein, Irwin J., 53, 733
Golub, Edward S., 389
Good, R. A., 87, 370, 671, 1079
Goodman, Anne, 1032
Gordon, Julius, 786
Graft: enhancing antibody: bioassay for normal skin grafts, 507
Graft *versus* host inhibition: incubated parental strain spleen and liver cells administered to F_1, 1042
Granger, Gale A., 911
Granger, Harriet, 618
Graves, J. H., 58
Green, Ira, 513
Grey, Howard M., 848

Hale, Edward M., 206
Hammond, W. G., 842
Hampar, B., 263, 397
Hanaoka, Masao, 1156, 1486
Hapten
hapten-specific insoluble immunoabsorbents prepared from hide powder (collagen), 647
tolerance to sulfanilic acid assessed by hapten-specific hemolytic plaque technique, 229
Hardison, Janet W., 1109
Hargie, Martha P., 1411
Haskill, J. S., 703
Hatcher, Victor B., 877
Hayden, Alonza R., 1394, 1398
Heart muscle: antigenicity of M proteins of group A hemolytic streptococci: absence of antigenic determinants common to mammalian heart muscle, 970
Heidelberger, Michael, 1119
Heiner, Douglas C., 476
Heller, Paul, 488
Hemagglutination
antigenic analysis of hemagglutinating subunits of animal influenza viruses, 1050
detection of pancreas-specific isoantibodies by bis-diazotized benzidine hemagglutination, 1208
hemagglutinins in various seeds, 1295
immunoglobulins: properties of IgG and IgM antibody in hemagglutination, precipitation and skin sensitization, 253
Hematopoietic system: pattern of immunoglobulin production in individual cells of hematopoietic origin in established culture, 1274
Hemingsen, Helen, 288
Hemocyanin: immune response of mice to keyhole limpet hemocyanin bound to macrophages, 893
Hemoglobin-free erythrocyte membranes, 573
Hemolysin
cytokinetics of appearance of hemolysin-forming cells in infected mice during the anamnestic response to sheep erythrocytes, 338
natural hemolysin in rainbow trout, 1202
Hemolysis
density distribution analysis of cells forming 19 S hemolytic antibody, 703
effect of serum on cells producing hemolytic antibodies in short-term experiments *in vitro*, 602
hemolytic measurement of C3 inactivator of man by inactivation of cell-bound C3, 533
immune hemolysis
anti-immunoglobulin control of immune hemolysis, 1242
serial studies on dissociability of IgG and IgM anti-Forssman antibodies by C'1a fixation and transfer technique, 986

inhibition of lytic effect of guinea pig complement by rabbit complement, 795
M proteins of group A hemolytic streptococci: absence of antigenic determinants common to mammalian heart muscle, 970
relationship of the hemolytic activity of active C'1s to its *p*-tosyl-L-arginine methyl ester esterase action: a new method of purification and assay, 421
tolerance to sulfanilic acid assessed by hapten-specific hemolytic plaque technique, 229
Henderson, Richard R., 1179
Hepatitis: antigenic properties of virus-like particles in sera of hepatitis patients, 1529
Herberman, Ronald B., 140, 842
Heredity (*see also* Genetics)
hereditary deficiency of second component of complement, 168
influence of heredity on immunoglobulin levels, 1504
Herpesvirus
antibodies to *Herpesvirus hominis* types 1 and 2, 956
correlation between neutralizing activity of human serum against herpes simplex virus and a simian herpesvirus (SA8), 397
discrimination between two strains (types) of herpes simplex virus by modifications of the neutralization test, 1179
Hess, W. M., 743
Heterologous antilymphocytic serum (*see* Antilymphocytic serum)
Hildreth, Eugene A., 1284
Hirara, A. A., 206
Hirsch, M. S., 656
Histamine release
from leukocytes by anti-γE antibodies, 884
in vitro release of leukocyte histamine by staphylococcal antigens, 437
mediated by two classes of antibodies, 327
Histocompatibility
cytotoxic antiglobulin technique for assay of antibodies to histocompatibility antigens, 140
mixed lymphocyte blastogenesis in response to multiple histocompatibility antigens, 107
reversal of post-thymectomy wasting with immunocompetent cells: influence of histocompatibility differences, 87
Hobbins, Thomas E., 1016
Hodgins, H. O., 1193, 1202
Holmes, E. C., 28
Homologous lymphoid transplants: isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
Homologous serum: reactivity of lymphocytes to homologous serum, 1526
Hong Kong influenza (*see* Influenza)
Hormones: thyroglobulin immunity: thyroid hormones and thyroglobulin specificity, 1511
Hornick, Richard B., 555
Host
graft *versus* host inhibition: incubated parental strain spleen and liver cells administered to F_1, 1042
quantitative precipitin analysis of influenza virus host antigen, 1144
Hotchin, John, 1128
Howard, Richard J., 266
Howar, Bruce F., 1102
Howe, Calderon, 573, 1144
Hraba, Tomáš, 229
Huber, Heinz, 404
Huber, Margret, 555, 1102
Hübner, K. F., 155
Hume, Evan B., 555
Humoral antibody production in splenectomized chicken, 1058
Humoral immunity (*see* Immunity)
Humoral immunologic competence: role of bursa in development, 671
Hyperimmune state: structure and activity of IgG and IgM antibodies synthesized in the primary response and in the hyperimmune state, 975
Hypersensitivity (*see* Delayed hypersensitivity)
Hyslop, Newton E., 751

Immobilizing antibodies in pyelonephritis, 1454
Immune lysis: passive immune lysis with chromic chloride-treated erythrocytes, 812
Immune response (*see also* Primary immune response)
alterations by attenuated Venezuelan equine encephalitis vaccine
adjuvant effect of Venezuelan equine encephalitis virus infection in guinea pigs, 1227
pathology and soluble antigen localization in guinea pigs, 1220
cellular and humoral antibody production in splenectomized chicken, 1058
effect of chlorphenesin on immune response, 1024
of mice to keyhole limpet hemocyanin bound to macrophages, 893
to different serotype antigens in monovalent and trivalent foot-and-mouth disease vaccines, 58
to vaccination with inactivated and live, attenuated mumps viruses, 1093
Immune serum: preparation of immune serum with neutralizing activity against cytomegalovirus SA6, 263
Immune state: structure and activity of IgG and

IgM antibodies synthesized in the primary response and in the hyperimmune state, 975
Immunity
development of cell-mediated and humoral immunity to lymphocytic choriomeningitis virus, 941
humoral immunity in malaria
estimation of parasitemia by electronic particle counting, 292
inhibition of parasitemia by serum antibody, 298
thyroglobulin immunity: thyroid hormones and thyroglobulin specificity, 1511
Immunization: refractory period in adoptive immunization after secondary stimulation, 375
Immunoabsorbents: hapten-specific insoluble immunoabsorbents prepared from hide powder (collagen), 647
Immunoadsorption
enrichment of antibody plaque-forming cells by immunoadsorption to an antigen-coated polyurethane foam, 908
of cells to an antibody-coated polyurethane foam, 899
Immunocompetent cells
in spleen and anterior kidney of rainbow trout, 1193
reversal of post-thymectomy wasting with immunocompetent cells: influence of histocompatibility differences, 87
Immunogenicity of a fragment of serum albumin, 733
Immunoglobulin (*see also* Anti-immunoglobulin *and* Globulin)
anti-dengue immunoglobulins and serum $\beta_{1\,c/a}$ globulin levels in dengue shock syndrome, 412
antigenic subtypes of human λ immunoglobulin chains, 172
characterization of IgM and IgG antibodies produced during the anamnestic response initiated *in vitro*, 317
comparative antigenic study of γE-globulin and myeloma-IgND, 826
comparison of Aa1 allotypic specificity carried by IgG and IgM, 1368
development and function of the immunoglobulin-producing system: role of the bursa in the development of humoral immunologic competence, 671
early syphilis: immunoglobulins reactive in immunofluorescence and other serologic tests, 1250
fixation of complement by γ1 and γ2 immunoglobulins, 269
γA
a new allotypic antigen of colostral γA immunoglobulin, 1156
identification and genetic control of three γA immunoglobulin allotypes, 544
IgA
cleavage of the Fc fragment of IgA, 488
fractionation procedure for isolation of IgA from pooled normal plasma, 625
synthesis of secretory IgA: evidence for synthesis as an 11 S dimer, 693
IgG
decreased rate of synthesis of immunoglobulin (IgG) in rats infected with Moloney leukemia virus, 1345
immunosuppressive effect of passively administered antibody IgG fragments, 1008
occurrence and properties of IgG_1 antibody, 713
susceptibility of anti-chlamydial IgG antibodies to reduction and alkylation, 1332
unusual conditions for crystallization of the Fc fragment of IgG, 1523
IgM
biologic activity and morphology of three types of IgM antibody subunits, 1064
latex reagent for determining IgM levels in cord and newborn sera, 679
immune hemolysis: serial studies on dissociability of IgG and IgM anti-Forssman antibodies by C'1a fixation and transfer technique, 986
immunoglobulin and specific antibody synthesis in a chronic inflammatory focus: antigen-induced synovitis, 355
influence of heredity and environment on immunoglobulin levels, 1504
isolation and characterization of free λ chain produced by an established cell line of myeloma cell origin, 1136
isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
molecular heterogeneity of immunoglobulin-M (γM-globulin), 496
ontogeny of circulating immunoglobulins in normal, bursectomized and irradiated chickens, 370
pattern of immunoglobulin production in individual cells of hematopoietic origin in established culture, 1274
preparation of fluorescent antibody reagents monospecific to light chains of immunoglobulin, 1268
production in cloned sublines of a human lymphocytoid cell line, 1388
properties of IgG and IgM antibody in hemagglutination, precipitation and skin sensitization, 253

quantitative estimation of antibodies in different immunoglobulin classes, 492
reference preparation for serum immunoglobulins, 792
specificity of a monoclonal macroglobulin (γM) antibody: reactivity with primate γG immunoglobulins, 222
stimulation of immunoglobulin and anamnestic antibody *in vitro*, 306
structural analysis of a slowly sedimenting proteolytic fragment of immunoglobulin M, 1032
structure and activity of IgG and IgM antibodies synthesized in the primary response and in the hyperimmune state, 975
synthesis by cultured myeloma cells, 1486
two antigenic subtypes of λ immunoglobulin chains, 172
use of insoluble antibody for quantitation of small amounts of immunoglobulin, 618
Inactivator: C3 inactivator: hemolytic measurement by inactivation of cell-bound C3, 533
Induction
effect of immunologically induced lymphopenia on antibody formation, 187
effect of isohemagglutinin on course of blood-induced *Plasmodium lophurae* infections, 688
induction of ocular resistance to vaccinia virus by typhoid vaccine: role of interferon, 145
induction of tolerance
in immunologically competent primates, 266
to γ-globulin by injection of antigen into intact organs *in vitro*, 347
induction of unresponsiveness
antigen form and mouse strain variation, 389
in adult with aggregated serum proteins, 1163
Infectious bronchitis: neutralizing antibody complex of infectious bronchitis virus, 720
Inflammation: immunoglobulin and specific antibody synthesis in a chronic inflammatory focus: antigen-induced synovitis, 355
Influenza virus
antigenic analysis of hemagglutinating subunits, 1050
antigenic relationship between equine and Hong Kong human variants of influenza type A2 virus, 530
biologic and immunologic characteristics of cold-adapted influenza virus, 728
inactivated influenza virus vaccine
antibody responses in children and elderly persons following local or parenteral administration of an inactivated influenza virus vaccine, A_2/Hong Kong/68 variant, 1102
antibody responses in nasal secretions and serum of elderly persons following local or parenteral administration of inactivated influenza virus vaccine, 555
quantitative precipitin analysis of influenza virus host antigen, 1144
subunit structure of influenza virus envelope protein, 1105
Inhibition
graft *versus* host inhibition: incubated parental strain spleen and liver cells administered to F_1, 1042
macrophage inhibition test: comparison of the skin and cell migration reactions during the development of delayed hypersensitivity, 852
of capillary migration by antigen-antibody complexes, 404
of *in vitro* cell migration in experimental allergic encephalomyelitis, 1431
of lytic effect of guinea pig complement by rabbit complement, 795
of macrophage migration by a skin-reactive polysaccharide from bacillus Calmette-Guérin culture filtrates, 1466
of mixed leukocyte culture reaction by preincubation of the leukocytes with sucrose, 786
Inhibition test
macrophage inhibition test: comparison of the skin and cell migration reactions during the development of delayed hypersensitivity, 852
use of insoluble antibody for quantitation of small amounts of immunoglobulin, 618
Inman, F. P., 1032, 1368
Insoluble antibody: use for quantitation of small amounts of immunoglobulin, 618
Insoluble immunoabsorbents: hapten-specific insoluble immunoabsorbents prepared from hide powder (collagen), 647
Intavivat, Anong, 412
Interchain disulfide bonds: presence of L-L bonds in reconstituted γG molecules, 848
Interferon
effect of diethylaminoethyl dextran on interferon production and protective effect in mice treated with the double-stranded polynucleotide complex polyinosinic-polycytidylic acid, 24
induction of ocular resistance to vaccinia virus by typhoid vaccine: role of interferon, 145
relation between viremia and interferon production of Japanese encephalitis virus, 662
Intima: antigens of normal and atherosclerotic intima, 1404
Intorp, Hans W., 1404
Intramuscular administration: antibody response to topical and intramuscular administration of trachoma antigens, 1290

Irradiation
effect of 10 kr on *in vitro* antibody synthesis by diffusion chamber cultures of spleen cells, 442
ontogeny of circulating immunoglobulins in irradiated chickens, 370
use of thymectomized, irradiated rats to study immunogenicity of bovine γ globulin, 925
Ishizaka, Kimishige, 69, 826, 884
Ishizaka, Teruko, 69, 826, 884
Isoantibodies: detection of pancreas-specific isoantibodies by bis-diazotized benzidine hemagglutination, 1208
Isoantigens available to circulating antibodies, 283
Isohemagglutinin: effect of induced isohemagglutinin on course of blood-induced *Plasmodium lophurae* infections, 688
Isologous lymphoid transplants: isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
Izenberg, Harriet, 123
Jasin, Hugo E., 355
Jerne plaque technique: critical variables of the technique as applied to antibody-forming systems responding to heterologous red cell antigens, 155
Johansson, S. Gunnar, 826, 884

Leukemia virus
decreased rate of synthesis of immunoglobulin (IgG) in rats infected with Moloney leukemia virus, 1345
immuno suppression by leukemia viruses: cytokinetics of appearance of hemolysin-forming cells in infected mice during anamnestic response to sheep erythrocytes, 338
Leukocyte
histamine release from leukocytes by anti-γE antibodies, 884
in vitro release of leukocyte histamine by staphylococcal antigens, 437
inhibition of the mixed leukocyte culture reaction by pre-incubation of the leukocytes with sucrose, 786
mycoplasmacidal effect of polymorphonuclear leukocyte extract, 698
Leukosis: density of BAI strain A avian leukosis virus-antibody complexes relative to antigen-antibody ratio, 1326
Levine, Bernard B., 647
Levi, Reuven, 1290
Levytska, Vera, 647
Lichter, Edward A., 544
Liebermann, George, 187
Light chain
light chains lacking b-allotypic specificities: isolation and characterization from normal and allotype suppressed homozygotes, 638
preparation of fluorescent antibody reagents monospecific to light chains of immunoglobulin, 1268

presence of L-L interchain disulfide bonds in reconstituted γG molecules, 848
Linscott, William D., 986, 993
Lipopolysaccharide: enhancement of antibody formation by *Escherichia coli* lipopolysaccharide and detoxified derivatives, 1411
Lipsmeyer, Eleanor A., 1074
Lloyd, Kenneth O., 1354
Local administration
antibody responses in children and elderly persons following local or parenteral administration of an inactivated influenza virus vaccine, A_2/Hong Kong/68 variant, 1102
antibody responses in nasal secretions and serum of elderly persons following local or parenteral administration of inactivated influenza virus vaccine, 555
Logan, Leslie C., 1250
Luce, Carolyn F., 956
Luciferase: chromatographic studies on spleen and lymph node extracts with antibody activity, 519
Lupus erythematosus: characterization of a soluble cytoplasmic antigen reactive with sera from patients with systemic lupus erythematosus, 117
Lymph node: chromatographic studies on spleen and lymph node extracts with antibody activity, 519
Lymphocyte
coccidioidin delayed hypersensitivity: skin test and *in vitro* lymphocyte reactivities, 1284
effect of antilymphocytic serum on lymphocytes, 179
immunoglobulin production in cloned sublines of a lymphocytoid cell line, 1388
lymphocyte *in vitro* cytotoxicity: mechanism of lymphotoxin-induced target cell destruction, 911
mixed lymphocyte blastogenesis in response to multiple histocompatibility antigens, 107
reactivity of lymphocytes to autologous and homologous serum, 1526
response of long- and short-lived small lymphocytes to pokeweed mitogen, 1260
Lymphocytic choriomeningitis virus detection of neutralizing antibody to lymphocytic choriomeningitis virus, 1128
development of humoral and cell-mediated immunity to lymphocytic choriomeningitis virus, 941
Lymphoid transplants: isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
Lymphoma: decreased rate of synthesis of immunoglobulin (IgG) in rats infected with Moloney leukemia virus, 1345
Lymphopenia: effect of immunologically induced lymphopenia on antibody formation, 187
Lymphotoxin: lymphocyte *in vitro* cytotoxicity: mechanism of lymphotoxin-induced target cell destruction, 911
Lynn, Raymond J., 859
Lysis: passive immune lysis with chromic chloride-treated erythrocytes, 812
Lysozyme and β-lysin release stimulated by antigen-antibody complexes and bacteria, 743
Lytic effect: inhibition of the lytic effect of guinea pig complement by rabbit complement, 795

Maassab, H. F., 728
MacGregor, Rob Roy, 131
Macpherson, Catherine F. C., 877
Macroglobulin: specificity of a monoclonal macroglobulin (γM) antibody: reactivity with primate γG immunoglobulins, 222
Macrophage
Ca^{++}-dependent binding of antigen-19 S antibody complexes to macrophages, 1172
delayed hypersensitivity: effect of pre-exposure to antigen on macrophage migration, 1074
immune response of mice to keyhole limpet hemocyanin bound to macrophages, 893
in vitro and *in vivo* properties of antimacrophage sera, 656
inhibition of macrophage migration by a skin-reactive polysaccharide from BCG culture filtrates, 1466
macrophage inhibition test: comparison of skin and cell migration reactions during the development of delayed hypersensitivity, 852

Nasal secretions: antibody responses in nasal secretions and serum of elderly persons following local or parenteral administration of inactivated influenza virus vaccine, 555
Nasopharynx: distribution of poliovirus antibody in serum, nasopharynx and alimentary tract following segmental immunization of lower alimentary tract with poliovaccine, 1423
"Natural" autoantibodies: characteristics, 682
Natural hemolysin in rainbow trout, 1202
Natvig, Jacob B., 611
Neisseria meningitidis: distribution of keto-deoxy-octonic acid and sialic acid, 1099
Nephritis
  autologous immune complex glomerulonephritis: cellular and parabiotic transfer, 194
  immobilizing antibodies in pyelonephritis, 1454
Nephrotoxic antibody: glycoprotein that induces nephrotoxic antibody: isolation and purification from glomerular basement membrane, 593
Neutralization
  antiserum neutralization of bacteriophage Q β: mathematical analysis, 206
  correlation between neutralizing activity of human serum against herpes simplex virus and a simian herpesvirus (SA8), 397
  detection of neutralizing antibody to lymphocytic choriomeningitis virus, 1128

kinetics of neutralization of bacteriophage ϕX 174 by antibodies, 772
neutralizing antibody complex of infectious bronchitis virus, 720
Neutralization test: discrimination between two strains (types) of herpes simplex virus by modifications of the neutralization test, 1179
Neutrophil chemotactic factor from C'5, 93
Newborn sera: latex reagent for determining IgM levels in cord and newborn sera, 679
Newman, Larry J., 93
Nickerson, D. Scott, 1235
Norins, Leslie C., 1250
Notkins, Abner L., 266
Nussenzweig, Victor, 1172

Ocular resistance: induction of ocular resistance to vaccinia virus by typhoid vaccine: role of interferon, 145
Ogra, Pearay L., 15, 1423
Oh, Jang O., 145
Oliveira, Benedito, 269
Opsonins: immune and normal opsonins during experimental staphylococcal infection, 1235
Osler, Abraham G., 269, 292
Osserman, Elliott F., 172
Oudin agar gel precipitin method: antigen-antibody reactions in agar: a micro-modification of the Oudin method for determination of antibody concentrations in absolute weight units, 1394
Ovalbumin: antigenicity of formaldehyde- and glutaraldehyde-treated serum albumin and ovalbumin-serum albumin conjugate, 457
Ovarian cyst fluid: blood groups: isolation and characterization from ovarian cyst fluid of a blood group substance lacking A, B, H, Le^a and Le^b specificity, 821
Ovary, Zoltan, 790
Overby, L. R., 206

Pancreas-specific isoantibodies: detection by bisdiazotized benzidine hemagglutination, 1208
Pappagianis, Demosthenes, 1284
Parasitemia
humoral immunity in malaria
estimation of parasitemia by electronic particle counting, 292
inhibition of parasitemia by serum antibody, 298
Parenteral administration
antibody responses in children and elderly persons following local or parenteral administration of an inactivated influenza virus vaccine, A_2/Hong Kong/68 variant, 1102
antibody response in nasal secretions and serum of elderly persons following local or parenteral administration of inactivated influenza virus vaccine, 555
Passive anaphylaxis
prevention of death from endotoxin with antisera: risk of fatal anaphylaxis to endotoxin, 563
role of fumaropimaric acid in complement dependent and non-complement dependent biologic reactions: inhibition of Forssman, reversed passive Arthus and passive cutaneous anaphylaxis reactions by fumaropimaric acid, 1
Passive immune lysis with chromic chloride-treated erythrocytes, 812
Passively administered antibody
immunosuppressive effect of passively administered antibody IgG fragments, 1008
mechanism of suppression of active antibody synthesis by passively administered antibody, 37
Patterson, Roy, 253, 466, 975
Pazin, George J., 1454
PCA (*see* Passive anaphylaxis)
Perucca, Philip J., 812
Peterson, Elbert A., 899, 908
Phage (*see* Bacteriophage)
Pharynx: distribution of poliovirus antibody in serum, nasopharynx and alimentary tract following segmental immunization of lower alimentary tract with poliovaccine, 1423
Phytohemagglutinin: facilitatory and inhibitory effects on experimental allergic encephalomyelitis, 63
Pincus, Theodore, 788
Plaque-forming cells
differentiation of antibody-forming cells: effect of antigen dose on proliferation of precursor cells and plaque-forming cells, 1084
enrichment of antibody plaque-forming cells by immunoadsorption to an antigen-coated polyurethane foam, 908
Plaque technique
critical variables of the Jerne plaque technique as applied to antibody-forming systems responding to heterologous red cell antigens, 155
tolerance to sulfanilic acid assessed by the hapten-specific hemolytic plaque technique, 229
Plasma: IgA: fractionation procedure for isolation of IgA from pooled normal plasma, 625
Plasmodium berghei: endotoxin-induced modification of *P. berghei* infection, 131
Plasmodium lophurae: effect of induced isohemagglutinin on course of blood-induced *P. lophurae* infections, 688
Plasmacytopoiesis: local plasmacytopoiesis in delayed hypersensitivity reactions, 1214

Plastic foam (*see* Polyurethane foam)
Platelet: mechanisms of induced injury to platelets, 241
Pneumococcus: relationships of streptococcal group and type polysaccharides to pneumococcal capsular antigens, 1119
Poliovaccine
  distribution of poliovirus antibody in serum, nasopharynx and alimentary tract following segmental immunization of lower alimentary tract with poliovaccine, 1423
  poliovirus antibody response in serum and nasal secretions following intranasal inoculation with inactivated poliovaccine, 15
Poliovirus (*see* Poliovaccine)
Polymorphonuclear leukocyte: mycoplasmacidal effect of polymorphonuclear leukocyte extract, 698
Polynucleotide complex: effect of diethylaminoethyl dextran on interferon production and protective effect in mice treated with the double-stranded polynucleotide complex polyinosinic-polycytidylic acid, 24
Polysaccharide
  inhibition of macrophage migration by a skin-reactive polysaccharide from bacillus Calmette-Guérin culture filtrates, 1466
  protein-carbohydrate interaction: effect of polysaccharide molecular weight on the concanavalin A-polysaccharide precipitation reaction, 53
  quantitative precipitin analysis of influenza virus host antigen and of sulfated mucopolysaccharides of embryonic allantoic fluid, 1144
  relationships of streptococcal group and type polysaccharides to pneumococcal capsular antigens, 1119
Polyurethane foam
  enrichment of antibody plaque-forming cells by immunoadsorption to an antigen-coated polyurethane foam, 908
  method for immunoadsorption of cells to an antibody-coated polyurethane foam, 899
Polyvinyl pyrrolidone: induction of immunity and immunologic paralysis against polyvinyl pyrrolidone, 1309
Porter, David D., 431
Porter, Helen G., 431
Precipitation
  immunoglobulins: properties of IgG and IgM antibody in hemagglutination, precipitation and skin sensitization, 253
  protein-carbohydrate interaction: effect of polysaccharide molecular weight on the concanavalin A-polysaccharide precipitation reaction, 53
Precipitin
  antigen-antibody reactions in agar
    micro-modification of the Oudin agar gel precipitin method for the determination of antibody concentration in absolute weight units, 1394
    treatment of antisera and optical densities of precipitin reactions, 1398
Precursor cells: differentiation of antibody-forming cells: effect of antigen dose on proliferation of precursor cells and plaque-forming cells, 1084
Premachandra, B. N., 1511
Pressman, David, 283, 1136, 1268, 1279, 1373, 1388
Primary binding: comparison of procedures to detect the primary binding of antigen by antibody, 832
Primary immune response: isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
Primary response: structure and activity of IgG and IgM antibodies synthesized in the primary response and in the hyperimmune state, 975
Proliferation
  antigen-induced cell proliferation in cultures from antibody-deficient chickens, 1079
  differentiation of antibody-forming cells: effect of antigen dose on proliferation of precursor cells and plaque-forming cells, 1084
Protein (*see also Streptococcus*)
  brain antigens: water soluble antigenic proteins of brain, 877
  isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
  myeloma
    acrylamide gel electrophoresis of purified antibodies and myeloma proteins, their heavy and light chains, 273
    lack of skin-sensitizing property of γD myeloma protein, 790
  purification of protein antigens by dissociation from thiolated antibody, 123
  response to altered encephalitogenic protein, 381
  streptococcal M protein
    antigenicity of the M proteins of group A hemolytic streptococci: absence of antigenic determinants common to mammalian heart muscle, 970
    delayed hypersensitivity to purified streptococcal M protein, 42

subunit structure of influenza virus envelope protein, 1105
unresponsiveness in adult: induction of unresponsiveness with aggregated serum proteins, 1163
Protein-carbohydrate interaction: effect of polysaccharide molecular weight on the concanavalin A-polysaccharide precipitation reaction, 53
Pruzansky, Jacob J., 253, 466, 975
p-tosyl-L-arginine methyl ester: relationship of the hemolytic activity of active C'1s to its *p*-tosyl-L-arginine methyl ester esterase action: a new method of purification and assay, 421
Pyelonephritis: immobilizing antibodies in pyelonephritis, 1454

Quie, Paul G., 1235

Rabies: evaluation of rabies immune globulin and homologous and heterologous antibody, 1314
Radovich, Jevrosima, 288
Raffel, S., 852, 1431
Rauch, Helene D., 1431
Reactivity
coccidioidin delayed hypersensitivity: skin test and *in vitro* lymphocyte reactivities, 1284
of lymphocytes to autologous and homologous serum, 1526
Reaginic antibodies
comparisons of reaginic antibodies from three species, 466
physicochemical properties of reaginic antibodies: effect of reduction and alkylation on γE antibodies, 69
Red blood cell (*see* Erythrocyte)
Reduction: physicochemical properties of reaginic antibodies: effect of reduction and alkylation on γE antibodies, 69
Reference preparation for serum immunoglobulins, 792
Refractory period in adoptive immunization after secondary stimulation, 375
Reichlin, Morris, 117
Reisfeld, R. A., 28, 638
Rejnek, J., 638
Renal glycoprotein that induces nephrotoxic antibody: isolation and purification from glomerular basement membrane, 593
Resistance: induction of ocular resistance to vaccinia virus by typhoid vaccine: role of interferon, 145
Respiratory syncytial virus: adjuvant effect of powdered ferric oxide: enhancement of response to *Mycoplasma pneumoniae* and respiratory syncytial virus vaccines, 1300
Responsiveness: effects of single low antigen doses on immunologic responsiveness in adult, 100
Reticuloendothelial system: effect of antilymphocytic serum on reticuloendothelial system, 1498
Reynolds, Scott L., 1227
Richardson, Marvis, 77
Rimm, Alfred A., 1042
Rita, G., 24
Roberts, Mary, 466
Robinson, Jennifer O., 947
Rode, Harold N., 786
Rodkey, L. S., 713
Roitt, Ivan M., 492
Rokutanda, Hinae K., 662
Romeyn, J. A., 1242
Rose, Bram, 476
Rose, Noel R., 375, 682, 1208
Roseman, Jeffrey M., 1002
Rosette-forming cells: ultrastructure of rosette-forming cells during antibody response, 1474
Ross, Stephen, 1242
Rothberg, Richard M., 100
Rowley, Donald A., 1002
Rubella: physical characteristics of rubella virus, 1016
Ruddy, Shaun, 533, 1379
Ruoslahti, E., 763
Russell, Philip K., 412

Saha, Anil, 476
Saltzstein, Edward C., 1042
Sambury, Sheldon, 476
Sandberg, Ann L., 269
Sarcoma: water soluble transplantation antigen from carcinogen-induced sarcomas, 28
Sargent, Austin U., 476
Schacher, Steven A., 679
Schenck, Jay R., 1411
Schmidt, Robert C., 1314
Schneck, Sidney, 37
Schwarz, M. Roy, 179, 1260
Scott, David W., 347
Secretory antibody response (*see* Poliovaccine)
Secretory IgA: synthesis of secretory IgA: evidence for synthesis as an 11 S dimer, 693
Segre, Diego, 1368
Segre, Mariangela, 1368
Seminal antigens: individual patterns, 1445
Sensitization (*see* Skin sensitization)
Serotype antigens: immune response of cattle to different serotype antigens in monovalent and trivalent foot-and-mouth disease vaccines, 58

Serum (*see also* specific cell type *or* disease)
antigenicity of formaldehyde- and glutaraldehyde-treated serum albumin and ovalbumin-serum albumin conjugate, 457
effect of serum on cells producing hemolytic antibodies in short-term experiments *in vitro*, 602
IgA: fractionation procedure for isolation of IgA from pooled normal plasma, 625
immunogenicity of a fragment of serum albumin, 733
latex reagent for determining IgM levels in cord and newborn sera, 679
reference preparation for serum immunoglobulins, 792
unresponsiveness in adult: induction of unresponsiveness with aggregated serum proteins, 1163
Sever, John L., 679
Shanbrom, Edward, 679
Shaw, Cheng-Mei, 63
Sheagren, John N., 131
Shibata, Seiichi, 593
Shin, Hyun S., 269
Shortman, Ken, 703
Shramek, Grace, 1093
Shulman, N. Raphael, 1529
Sialic acid: distribution of keto-deoxyoctonic acid and sialic acid in *Neisseria meningitidis*, 1099
Sikes, R. Keith, 1314
Sikora, Edward, 1128
Simpson, Blanche A., 1163
Siskind, Gregory W., 37, 513
Skin grafts: enhancing antibody: bioassay for normal skin grafts, 507
Skin reaction
inhibition of macrophage migration by a skin-reactive polysaccharide from bacillus Calmette-Guérin culture filtrates, 1466
macrophage inhibition test: comparison of the skin and cell migration reactions during the development of delayed hypersensitivity, 852
Skin sensitization
lack of skin-sensitizing property of γD myeloma protein, 790
properties of IgG and IgM antibody in hemagglutination, precipitation and skin sensitization, 253
Skin test: coccidioidin delayed hypersensitivity: skin test and *in vitro* lymphocyte reactivities, 1284
Smart, Kenwyn, 476
Smith, Kendall O., 1016, 1529
So, Lucy L., 53
Solomon, Alan, 496
Sparks, F. C., 842
Specificity
comparison of Aa1 specificity carried by IgG and IgM, 1368
light chains lacking b-allotypic specificities: isolation and characterization of light chains from normal and allotype suppressed homozygotes, 638
of a monoclonal macroglobulin (γM) antibody: reactivity with primate γG immunoglobulins, 222
thyroglobulin immunity: thyroid hormones and thyroglobulin specificity, 1511
Spitler, Lynn, 404
Spleen
antibody response in rainbow trout: immunocompetent cells in spleen and anterior kidney, 1193
chromatographic studies on spleen and lymph node extracts with antibody activity, 519
immune response: cellular and humoral antibody production in splenectomized chicken, 1058
in vitro antibody synthesis by diffusion chamber cultures of spleen cells
effect of increased levels of free antibody, 451
methods and effect of 10 kr on antibody synthesis, 442
Staab, Edward V., 1227
Staphylococcus
immune and normal opsonins during staphylococcal infection, 1235
in vitro release of leukocyte histamine by staphylococcal antigens, 437
Stayner, Larry 1260
Steinberg, Alfred D., 788
Steinmeier, Robert, 679
Stevens, D. A., 397
Stinski, M. F., 720
Stock, Aaron H., 859
Stollerman, Gene H., 42
Stone, Marvin J., 222
Stone, Sanford H., 751
Storb, R., 1474
Storb, U., 1474
Strander, H., 602
Streptococcus
antigenicity of the M proteins of group A hemolytic streptococci: absence of antigenic determinants common to mammalian heart muscle, 970
chemical structure and antigenic determinant of Type II antigen of group F streptococci, 215
cross-reactivity between *S. bovis*, strain S19, and Group A streptococcal carbohydrates, 870

delayed hypersensitivity to purified streptococcal M protein, 42
extracellular esterases of streptococci and the distribution of specific antibodies in sera of various age groups, 859
relationships of streptococcal group and type polysaccharides to pneumococcal capsular antigens, 1119
Stroud, R. M., 421
Stutman, O., 87
Subtypes of ABO blood groups and subtype-specific antibodies, 763
Sulfanilic acid: tolerance to sulfanilic acid assessed by hapten-specific hemolytic plaque technique, 229
Sulfated mucopolysaccharides: quantitative precipitin analysis of influenza virus host antigen and of sulfated mucopolysaccharides of embryonic allantoic fluid, 1144
Suppression
immunosuppression by leukemia viruses: cytokinetics of appearance of hemolysin-forming cells in infected mice during anamnestic response to sheep erythrocytes, 338
immunosuppressive effect of passively administered antibody IgG fragments, 1008
mechanism of suppression of active antibody synthesis by passively administered antibody, 37
Svehag, Sven-Eric, 1064
Swanborg, Robert H., 381
Syncytial virus: adjuvant effect of powdered ferric oxide: enhancement of response to *Mycoplasma pneumoniae* and respiratory syncytial virus vaccines, 1300
Synovitis: immunoglobulin and specific antibody synthesis in a chronic inflammatory focus: antigen-induced synovitis, 355
Synthesis (*see* Antibody *and* Immunoglobulin)
Syphilis: early syphilis: immunoglobulins reactive in immunofluorescence and other serologic tests, 1250

Takagi, N., 1388
Takahashi, Morinobu, 1268, 1274, 1388
Takano, Kouichi, 1300
Takuma, Takehide, 593
Talal, Norman, 788
Talmage, David W., 288
TAMe (*see* *p*-tosyl-L-arginine methyl ester)
Tate, William J., III, 563
Tew, John G., 743
Theis, Gail A., 513
Thiolated antibody: purification of protein antigens by dissociation from thiolated antibody, 123
Thymectomy
reversal of post-thymectomy wasting with immunocompetent cells: influence of histocompatibility differences, 87
use of thymectomized, irradiated rats to study immunogenicity of bovine γ globulin, 925
Thyroglobulin immunity: thyroid hormones and thyroglobulin specificity, 1511
Ting, C. C., 842
Tischendorf, Frank W., 172
Tolerance
in the dinitrophenyl poly-L-lysine immune system, 513
induction of tolerance in immunologically competent primates, 266
mechanism of tolerance: induction of tolerance to γ-globulin by injection of antigen into intact organs *in vitro*, 347
to sulfanilic acid assessed by the hapten-specific hemolytic plaque technique, 229
Tomasi, Thomas B., Jr., 117
Topical administration: antibody response to topical and intramuscular administration of trachoma antigens, 1290
Torrigiani, Giorgio, 492
Toxicity
cytotoxic antiglobulin technique for assay of antibodies to histocompatibility antigens, 140
lymphocyte *in vitro* cytotoxicity: mechanism of lymphotoxin-induced target cell destruction, 911
Trachoma: antibody response to topical and intramuscular administration of trachoma antigens, 1290
Transfer
autologous immune complex glomerulonephritis: cellular and parabiotic transfer, 194
refractory period in adoptive immunization after secondary stimulation, 375
Transfer technique (*see* Complement)
Transplantation
availability of transplantation alloantigens to circulating antibodies: studies with alloantibodies of known specificity, 1373
isologous and homologous lymphoid transplants: isolation of three stages of immunoglobulin production in the differentiation of the primary immune response to protein antigen, 751
water soluble transplantation antigen from carcinogen-induced sarcomas, 28
Trevino, Gilberto S., 1220
Trivalent vaccine: immune response of cattle to different serotype antigens in trivalent and monovalent foot-and-mouth disease vaccines, 58
Tsuji, Frederick I., 519
Tuberculin (*see* Bacillus Calmette-Guérin)
Twarog, Frank J., 375

Tyler, Ruth W., 179
Typhoid vaccine: induction of ocular resistance to vaccinia virus by typhoid vaccine: role of interferon, 145

Uhr, Jonathan W., 772
Unanue, Emil R., 893
Unresponsiveness (*see* Induction *and* Tolerance)

Vaccines (*see* specific diseases)
Vaccinia virus: induction of ocular resistance to vaccinia virus typhoid vaccine: role of interferon, 145

CONTENTS

NUMBER 1, JANUARY 1969

IMMUNOCHEMISTRY

Role of Fumaropimaric Acid in Guinea Pig Complement Dependent and Non-Complement Dependent Biologic Reactions. I. Inhibition of Forssman, Reversed Passive Arthus, and PCA Reactions by Fumaropimaric Acid. M. Michael Glovsky, Peter A. Ward, Elmer L. Becker and Noah J. Halbrook 1

Protein-Carbohydrate Interaction. XVII. The Effect of Polysaccharide Molecular Weight on the Concanavalin A-Polysaccharide Precipitation Reaction. Lucy L. So and I. J. Goldstein 53

Physicochemical Properties of Human Reaginic Antibodies. VIII. Effect of Reduction and Alkylation on γE Antibodies. Kimishige Ishizaka and Teruko Ishizaka 69

Purification of Two Protein Antigens by Dissociation from Thiolated Antibody. Benjamin Wolf and Harriet Izenberg 123

Hereditary Deficiency of the Second Component of Complement in Man: An Immunochemical Study. Martin R. Klemperer 168

Two Antigenic Subtypes of Human Lambda Immunoglobulin Chains. Frank W. Tischendorf and Elliott F. Osserman 172

Studies on the Chemical Structure and the Antigenic Determinant of Type II Antigen of Group F Streptococci. Marc F. Michel, Jeanette van Vonno and Richard M. Krause 215

The Specificity of a Monoclonal Macroglobulin (γM) Antibody: Reactivity with Primate γG Immunoglobulins. Marvin J. Stone and Henry Metzger 222

Immunoglobulins of the Rhesus Monkey (*Macaca mulatta*). II. Properties of Rhesus IgG and IgM Antibody in Hemagglutination, Precipitation and Skin Sensitization. James D. Lakin, Roy Patterson and Jacob J. Pruzansky 253

CELLULAR IMMUNOLOGY

Water Soluble Guinea Pig Transplantation Antigen from Carcinogen-Induced Sarcomas. B. D. Kahan, E. C. Holmes, R. A. Reisfeld and D. L. Morton 28

Delayed Hypersensitivity to Purified Streptococcal M Protein in Guinea Pigs and in Man. Edwin H. Beachey, Humberto Alberti and Gene H. Stollerman 42

Antibody Elicited by *Brucella abortus* Antigen *in Vitro*: Prolonged Production by Cell Suspensions. Marvis Richardson 77

Reversal of Post-Thymectomy Wasting in Mice with Immunocompetent Cells: Influence of Histocompatibility Differences. O. Stutman, E. J. Yunis and R. A. Good 87

A Neutrophil Chemotactic Factor from Human C'5. Peter A. Ward and Larry J. Newman 93

The Effects of Single Low Antigen Doses on Immunologic Responsiveness in Adult Rabbits. Sumner C. Kraft and Richard M. Rothberg 100

Mixed Lymphocyte Blastogenesis in Response to Multiple Histocompatibility Antigens. Daniel G. Colley and Charles W. DeWitt 107

A Cytotoxic Antiglobulin Technique for Assay of Antibodies to Histocompatibility Antigens. Leroy Fass and Ronald B. Herberman 140

Critical Variables of the Jerne Plaque Technique as Applied to Rodent Antibody-Forming Systems Responding to Heterologous Red Cell Antigens. K. F. Hübner and N. Gengozian 155

Effect of Antilymphocytic Serum on Rat Lymphocytes. Ruth W. Tyler, N. B. Everett and M. Roy Schwarz 179

The Effect of Immunologically Induced Lymphopenia on Antibody Formation. John Baum, George Liebermann and Eugene P. Frenkel 187

Immunologic Tolerance to Sulfanilic Acid Assessed by the Hapten-Specific Hemolytic Plaque Technique. Tomáš Hraba and Bruce Merchant 229

IMMUNOPATHOLOGY

Studies on the Mechanism of the Suppression of Active Antibody Synthesis by Passively Administered Antibody. Henry Chang, Sidney Schneck, Neil I. Brody, Alice Deutsch and Gregory W. Siskind 37

Facilitatory and Inhibitory Effects of Phytohemagglutinin on Experimental Allergic Encephalomyelitis in Guinea Pigs. Cheng-Mei Shaw 63
Characterization of a Soluble Cytoplasmic Antigen Reactive with Sera from Patients with Systemic Lupus Erythematosus. Geoffrey Clark, Morris Reichlin and Thomas B. Tomasi, Jr. 117
Autologous Immune Complex Glomerulonephritis. III. Studies on Cellular and Parabiotic Transfer. Richard J. Glassock, J. Ian Watson, T. S. Edgington and Frank J. Dixon 194
Two Mechanisms of Immunologically-Induced Injury to Rabbit Platelets. Roger M. des Prez and Richard E. Bryant 241

MICROBIAL AND VIRAL IMMUNOLOGY

Poliovirus Antibody Response in Serum and Nasal Secretions following Intranasal Inoculation with Inactivated Poliovaccine. Pearay L. Ogra and David T. Karzon 15
Effect of DEAE-Dextran on Interferon Production and Protective Effect in Mice Treated with the Double-Stranded Polynucleotide Complex Polyinosinic-Polycytidylic Acid. F. Dianzani, G. Rita, P. Cantagalli and S. Gagnoni 24
Immune Response of Cattle to Different Serotype Antigens in Monovalent and Trivalent Foot-and-Mouth Disease Vaccines. J. H. Graves 58
Endotoxin-Induced Modification of *Plasmodium berghei* Infection in Mice. Rob Roy MacGregor, John N. Sheagren and Sheldon M. Wolff 131
Induction of Ocular Resistance to Vaccinia Virus by Typhoid Vaccine: Role of Interferon. Jang O. Oh and Chieko Yoneda 145
Antiserum Neutralization of Bacteriophage Q β: A Mathematical Analysis. Edward M. Hale, A. A. Hirata, R. A. Brusenback and L. R. Overby 206

COMMUNICATIONS

Preparation of Rabbit Immune Serum with Neutralizing Activity against a Simian Cytomegalovirus (SA6). D. V. Ablashi, L. M. Martos, R. V. Gilden and B. Hampar 263
Induction of Tolerance in Immunologically Competent Primates. Richard J. Howard, John C. Landon, Suanne F. Dougherty, Abner L. Notkins and Stephan E. Mergenhagen 266
The Fixation of Guinea Pig Complement by γ1 and γ2 Immunoglobulins. Abraham G. Osler, Benedito Oliveira, Hyun S. Shin and Ann L. Sandberg 269

NUMBER 2, FEBRUARY 1969

IMMUNOCHEMISTRY

Studies on Human Antibodies. VII. Acrylamide Gel Electrophoresis of Purified Human Antibodies and Myeloma Proteins, Their Heavy and Light Chains. Marianne M. Dorner, William J. Yount and Elvin A. Kabat 273
The Relationship of the Hemolytic Activity of Active C'1s to Its TAMe Esterase Action: A New Method of Purification and Assay. K. Nagaki and R. M. Stroud 421
A Study of the Antigenicity of Formaldehyde- and Glutaraldehyde-Treated Bovine Serum Albumin and Ovalbumin-Bovine Serum Albumin Conjugate. A. F. S. A. Habeeb 457
Comparisons of Reaginic Antibodies from Three Species. Roy Patterson, Mary Roberts and Jacob J. Pruzansky 466
Studies on Cryoprecipitation. II. Immunochemical Characterization of a Human Cryoglobulin. Anil Saha, Sheldon Sambury, Kenwyn Smart, Douglas C. Heiner, Austin U. Sargent and Bram Rose 476
Cleavage of the Fc Fragment of IgA. Vincent Yakulis, Nicolas Costea and Paul Heller 488
Quantitative Estimation of Antibodies in Different Immunoglobulin Classes. Giorgio Torrigiani and Ivan M. Roitt 492
Molecular Heterogeneity of Immunoglobulin-M (γM-Globulin). Alan Solomon 496

CELLULAR IMMUNOLOGY

Isoantigens Available to Circulating Antibodies. Isaac Witz, Nathan Kaliss and David Pressman 283
The Immunologic Memory of LAF_1 Mice following a Single Injection of Sheep Red Cells. Jevrosima Radovich, Helen Hemingsen and David W. Talmage 288

Stimulation of Immunoglobulin and Anamnestic Antibody *in Vitro*. Diane J. Yashphe and Albert H. Coons 306
Characterization of IgM and IgG Antibodies Produced during the Anamnestic Response Initiated *in Vitro*. Henry P. Godfrey, Diane J. Yashphe and Albert H. Coons 317
Biologic Properties of Rat Antibodies. III. Histamine Release Mediated by Two Classes of Antibodies. Herbert C. Morse, III, K. Frank Austen and Kurt J. Bloch 327
Mechanism of Immunologic Tolerance. I. Induction of Tolerance to Bovine γ-Globulin by Injection of Antigen into Intact Organs *in Vitro*. David W. Scott and Byron H. Waksman 347
Ontogeny of Circulating Immunoglobulins in Normal, Bursectomized and Irradiated Chickens. Ronee van Meter, R. A. Good and M. D. Cooper 370
A Refractory Period in Adoptive Immunization following Secondary Stimulation of Mice. Frank J. Twarog and Noel R. Rose 375
Studies on the Induction of Immunologic Unresponsiveness. III. Antigen Form and Mouse Strain Variation. Edward S. Golub and William O. Weigle 389
Inhibition of Capillary Migration by Antigen-Antibody Complexes. Lynn Spitler, Heinz Huber and H. Hugh Fudenberg 404
The *in Vitro* Release of Leukocyte Histamine by Staphyloccal Antigens. R. Russell Martin and Arthur White 437
In Vitro Antibody Synthesis by Diffusion Chamber Cultures of Spleen Cells. I. Methods and Effect of 10,000 r on Antibody Synthesis. Douglas C. Vann and T. Makinodan 442
In Vitro Antibody Synthesis by Diffusion Chamber Cultures of Spleen Cells. II. Effect of Increased Levels of Free Antibody. Douglas C. Vann 451
Enhancing Antibody. I. Bioassay for Normal Skin Grafts. Barry Zimmerman and Joseph D. Feldman 507
A Study of Immunologic Tolerance in the Dinitrophenyl Poly-L-Lysine Immune System. Gail A. Theis, Ira Green, Baruj Benacerraf and Gregory W. Siskind 513
Chromatographic Studies on Spleen and Lymph Node Extracts with Antibody Activity. Frederick I. Tsuji, David L. Davis and David H. Donald 519

IMMUNOPATHOLOGY

Immunoglobulin and Specific Antibody Synthesis in a Chronic Inflammatory Focus: Antigen-Induced Synovitis. Hugo E. Jasin and Morris Ziff 355
Immunologic Response to Altered Encephalitogenic Protein in Guinea Pigs. Robert H. Swanborg 381

MICROBIAL AND VIRAL IMMUNOLOGY

Humoral Immunity in Rodent Malaria. I. Estimation of Parasitemia by Electronic Particle Counting. Carter L. Diggs and Abraham G. Osler 292
Humoral Immunity in Rodent Malaria. II. Inhibition of Parasitemia by Serum Antibody. Carter L. Diggs and Abraham G. Osler 298
Immunosuppression by Leukemia Viruses. II. Cytokinetics of Appearance of Hemolysin-forming Cells in Infected Mice during the Anamnestic Response to Sheep Erythrocytes. Walter S. Ceglowski and Herman Friedman 338
Correlation between the Neutralizing Activity of Human Serum against Herpes Simplex Virus and a Simian Herpesvirus (SA8). B. Hampar, D. A. Stevens, L. M. Martos, D. V. Ablashi, M. A. K. Burroughs and G. A. Wells 397
Anti-Dengue Immunoglobulins and Serum $\beta_{1c/s}$ Globulin Levels in Dengue Shock Syndrome. Philip K. Russell, Anong Intavivat and Sopana Kanchanapilant 412
Immunofluoresence Assay for Antigen and Antibody in Lactic Dehydrogenase Virus Infection of Mice. David D. Porter, Helen G. Porter and Beverly B. Deerhake 431

inhaled, characterization of human precipitating antibody to, 244
injection after radiation on the initial and

anamnestic IgM hemolysin responses in rabbits, 559
isolated from body fluid of *Ascaris suum*, 15
-lymphocyte interaction, products of, 1072
particulate and soluble, of *Rickettsia tsutsugamushi* in the complement fixation test, 480
periodate-sensitive, associated with histone, varying specificity of systemic lupus erythematosus sera for, 804
processing in macrophages, ultrastructural identification of possible sites of, 618
radioiodinated, and immunoglobulin-coated bentonite, reaction of, as a basis for antibody detection and antigen binding, 1385
related to type-specificity and protection, 149
responsible for nephrotoxic serum nephritis, 736
-sensitive cells, preferential effect of antilymphocyte serum on, 648
serum soluble, in malaria, 6
somatic, flagellar and Vi, amounts of IgM specific for, 924
surface, on interspecies hybrid cells, 1050
thymus-specific, identification and isolation of, 953
tuberculin, "buffy coat" cells and, 179
use of affinity chromatography for specific purification of, 380
Antigenic stimulation, heterologous, effect on antibody synthesis, 1411
Antigenicity of human IgG produced by three lymphocytoid cell lines from a single individual, differences, 1176
Anti-IgE, insoluble immunoadsorbents containing, removal of reaginic activity and subsequent elution, 622
Antilymphocyte serum
heterologous, 648
immunosuppressive capacity of, 979, 990, 1000
Anti-lymphocyte-treated mice, role of serum protective factor in Langat virus infection of, 1424
Antimacrophage serum, effect on antibody production and phagocytosis in mice, 372
Antimucopeptide antibodies and their specificity, 196
Anti-pneumococcal antibodies, types III and VIII, quantitative studies of the specificity of, 491
Anti-S3 antibodies and their Fab fragments, binding of labeled hexasaccharides derived from S3 by, 491
Antisera
against *Escherichia coli* tryptophan synthetase α subunit, 1377
anti-b5, allotype suppression with, 629
human plasma protein, immuno-precipitates of human plasma proteins with, 100
immunoglobulin-class-specific, simplified procedure for preparation of, 56
leukocyte granule membrane, lysosome stabilization by, 39
Antithymocyte serum, 648
heterologous, effects in mice, 1288
Antithymus
cytotoxicity, 953
serum, effects on thymic lymphopoiesis, 778
Antunes, Lucyrn Jones, 334
Aorta, rabbit autoantibodies to, 544
Arbesman, C. E., 622
Argyris, Bertie F., 372
Artenstein, Malcolm S., 891
Arthus reactions, fate of antigen in, 1395
Ascaris suum, antigen isolated from body fluid of, 15
Askonas, Brigitte A., 71
Asofsky, Richard, 741
Ataxia-telangiectasia, lymphocyte transformation, impairment in, 1212
Autoantibodies
in obese chickens, 708
rabbit, to aorta, 544

Bacillus anthracis, poly-γ-D-glutamyl capsule of, 937
Bacitracin A, PCA and Schultz-Dale reactions elicited by DNP-derivatives of, 751
Bacterial adherence colony method for enumeration of antibody-forming cells to *E. coli* somatic antigen, 204
Bacteriophage
penicilloyl, inactivation of, by IgM and IgG antibodies, 45
poly-D-alanyl, inactivation of, by IgM and IgG antibodies, 45
T4
inactivation of, by IgM and IgG antibodies, 45
neutralization by rabbit immunoglobulin and its proteolytic digestion fragments, 596

Leukocyte
granule membrane antiserum, lysosome stabilization by, 39
homogenous cultures treated with phytohemagglutinin, 17D yellow fever virus replication and interferon production in, 429
human, specific role in viral infections, 429
responses to endotoxin, genetic factors, 32
Levine, Bernard B., 931
Lichtenstein, Lawrence M., 866
Lichter, Edward A., 662
Lindqvist, K. J., 378
Linscott, William D., 423, 474, 607
Lipoproteins, low density, gene expression in, 163
Little, J. Russell, 809
Liu, Chi Tan, 879, 907
Loegering, David A., 1294
Lopez, Manuel, 1428
Lucena, Guillermo, 1061
Lykins, J. D., 6
Lymphocyte
alloantigens, human, isolation, purification and properties, 282
antigenic stimulation of, 1072
bursal, prolonged depletion, and suppression of antibody formation following irradiation of the bursa of Fabricius, 537
culture, studies, 1072

cytotoxins in tuberculin reaction, 570
human, release of lymphotoxin from, correlation of derepression with, 170
in vitro cytotoxicity, 170
PPD-primed x-irradiated, blastogenesis of, 1078
response to phytomitogens *in vitro*, 1185
thymus, impaired activation of, by phytohemagglutinin, 818
transformation
impairment in ataxia-telangiectasia, 1212
in serum nephritis, 364
Lymphocytoid cell lines, three from single individual, differences in antigenicity of human IgG produced by, 1176
Lymphoid cells
allogeneic, γ globulin synthesis in mixed cultures of, 679
producing anti-2,4-dinitrophenyl-hapten antibody, 357
ribonucleic acid of, conversion of spleen cells to antibody-forming cells by, 1196
Lymphoid precursors, 1283
Lymphopoiesis, thymic, effects of antithymus serum on, 778
Lymphotoxin, release of, from human lymphocytes, correlation of derepression with, 170
Lysosome stabilization by leukocyte granule membrane antiserum, 39

Macaca mulatta, immunoglobulins of, 577
Mackenzie, Malcolm R., 607
Mackey, Gail, 129
MacLean, Lloyd D., 114
Macrophage
cytotoxins, in tuberculin reaction, 570
role in stimulation of immune responses by adjuvants, 71
spreading, inhibition of, and delayed hypersensitivity, 1
ultrastructural identification of possible sites of antigen processing in, 618

Copyright ©, 1969, by The Williams & Wilkins Company

CONTENTS

NUMBER 1, JULY 1969

IMMUNOCHEMISTRY

Development of Human Complement System. Philip Fireman, Dolores A. Zuchowski and Paul M. Taylor 25
Inactivation of Bacteriophage T4, of Poly-D-alanyl Bacteriophage and of Penicylloyl Bacteriophage by Immunospecifically Isolated IgM and IgG Antibodies. Joseph Haimovich and Michael Sela 45
A Simplified Procedure for the Preparation of Immunoglobulin-Class-Specific Antisera. Christopher S. Henney and Kimishige Ishizaka 56
Immuno-Precipitates of Some Purified and Unpurified Human Plasma Proteins with Monospecific and Polyvalent Human Plasma Protein Antisera. M. Ceska 100
"Sandwich" Solid Phase Radioimmunoassay for the Quantitative Determination of Human Immunoglobulins. Sydney E. Salmon, Gail Mackey and H. Hugh Fudenberg 129

IMMUNOGENETICS

Genetic Control of the Immune Response in Mice. I. Segregation Data and Localization to the Fifth Linkage Group of a Gene Affecting Antibody Production. David L. Gasser. 66
Immunochemistry and Genetics of a "New" Allotypic Specificity A_x^{14} of Rabbit γG Immunoglobulins: Recombination in Somatic Cells. S. Dubiski 120

CELLULAR IMMUNOLOGY

Genetic Factors in Leucocyte Responses to Endotoxin: Further Studies in Mice. Barnet M. Sultzer 32
Lysosome Stabilization by Leukocyte Granule Membrane Antiserum. Robert H. Persellin 39
Effects of Temperature upon "Naturally Occurring" Blood Group Agglutinins in Fresh Water Catfish. William J. Kuhns, Ross F. Nigrelli and Joseph V. Chuba 62
A Role of Macrophages in the Stimulation of Immune Responses by Adjuvants. Emil R. Unanue, Brigitte A. Askonas and Anthony C. Allison 71
The Effect of Carrageenan on Delayed Hypersensitivity Reactions. Howard J. Schwartz and Sidney Leskowitz 87

IMMUNOPATHOLOGY

Antibody in Nasal Secretions after Intramuscular Injection of Influenza Virus Vaccine in Persons with Chronic Bronchopulmonary Disease. Robert H. Alford 20
Tolerance Induction with Thymus Grafts in Neonatally Thymectomized Mice. O. Stutman, E. J. Yunis and R. A. Good 92
A Graft *vs.* Host Reaction in a Xenogeneic Combination: The Reaction of Murine Cells in Rats. Wasfy Saleh, Lloyd D. MacLean and Julius Gordon 114

MICROBIAL AND VIRAL IMMUNOLOGY

Delayed Hypersensitivity and Inhibition of Macrophage Spreading: *in Vivo* and *in Vitro* Studies of Tuberculin and Streptococcal Hypersensitivities in Guinea Pigs. Dragan Dekaris, Robert M. Fauve and Marcel Raynaud 1
Identification of an Antigen and Specific Antibody in the Sera of Chickens Infected with *Plasmodium gallinaceum*. A. R. Smith, J. D. Lykins, E. W. Voss and M. Ristic 6
Serologic Activity of Antigen Isolated from the Body Fluid of *Ascaris suum*. José Oliver-González, Patricia Hurlbrink, Encarnita Conde and Irving G. Kagan 15
The Immunologic Response of the Mouse to Aerosols of an Attenuated Encephalomyocarditis Virus Strain. Catherine M. Prato and Thomas G. Akers 79
A Study of the Neutralization of Rhinoviruses by Means of a Plaque-Reduction Test. Milan Fiala 107

COMMUNICATIONS

"*In Vitro*" Cell Reactions in Delayed Hypersensitivity. S. B. Salvin and Jane Nishio 138
Specific Antisera to $\overline{C1s}$: Detection of Different Electrophoretic Species of C1s. Kazuyoshi Nagaki and Robert M. Stroud 141
Identification of IgA in Rat Serum and Secretions. D. R. Nash, J. P. Vaerman, H. Bazin and J. F. Heremans 145

NUMBER 2, AUGUST 1969

IMMUNOCHEMISTRY

Antimucopeptide Antibodies and Their Specificity. Mary Rolicka and James T. Park 196
Human IgG and IgA Diphtheria Antitoxins in Serum, Nasal Fluids and Saliva. Richard W. Newcomb, Kimishige Ishizaka and Bonita L. DeVald 215
Immunochemical Studies of the Phytohemagglutinin, Concanavalin A. Donald A. Person and Harold Markowitz 225
The Production of Tolerance to Human Erythrocytes in the Rat with Cytosine Arabinoside or Cyclophosphamide. Robert O. Gordon, Maclyn E. Wade and Malcolm S. Mitchell 233
Characterization of Human Precipitating Antibody to Inhaled Antigens. Jordan N. Fink, Thomas Tebo and Joseph J. Barboriak 244
Human Lymphocyte Membrane (HL-A) Alloantigens: Isolation, Purification and Properties. Dean L. Mann, G. Nicholas Rogentine, John L. Fahey and Stanley Nathenson 282
Interaction of Concanavalin with Polysaccharides of *Histoplasma capsulatum*. Harold Markowitz 308
Studies on the Antigenicity of Bacterial Ferredoxins. I. The Effect of Modification of Cysteinyl Residues on the Antigenicity of *Clostridium pasteurianum* Ferredoxin. Rodney M. Nitz, Barbara Mitchell, Julia Gerwing and John Christensen 319
Characterization of the Serum and Secretory Immune Systems of the Cow and Sheep. Albert L. Sullivan, Robert A. Prendergast, Lucyrn Jones Antunes, Arthur M. Silverstein and Thomas B. Tomasi, Jr. 334
Metabolic Studies of a Heavy Chain Disease Protein. Daniel Ein and Thomas A. Waldmann 345

IMMUNOGENETICS

Identification and Genetic Control of Two New Low-Density Lipoprotein Allotypes: Phenogroups at the *Lpq* Locus. John J. Albers and Sheldon Dray 155
Allelic Exclusion and Phenogroup Expression in Individual Molecules of Rabbit Low-Density Lipoprotein Allotypes. John J. Albers and Sheldon Dray 163

CELLULAR IMMUNOLOGY

Lymphocyte *in Vitro* Cytotoxicity: Correlation of Derepression with Release of Lymphotoxin from Human Lymphocytes. Terry W. Williams and Gale A. Granger 170
Capillary Tube Migration for Detection of Human Delayed Hypersensitivity: Difficulties Encountered with "Buffy Coat" Cells and Tuberculin Antigen. H. Benfer Kaltreider, David Soghor, Janie B. Taylor and John L. Decker 179
The Suppressive Effect of Rauscher Leukemia Virus on the Secondary Antibody Response of Spleen Cells Cultured in Cell-Impermeable Diffusion Chambers. Luis Borella 185
Studies on the Mechanisms of Resistance to Phylogenetically Diverse Intracellular Organisms. Joel Ruskin, Jean McIntosh and Jack S. Remington 252
Specificity of the Immunosuppression Caused by Passive Administration of Antibody. Jean-Charles Cerottini, Patricia J. McConahey and Frank H. Dixon 268
Studies on the Radiosensitive Phase of the Antibody Response in Rabbits. II. Recovery and the Secondary Response. James F. Pribnow and Myron S. Silverman 276
The Effect of Dose of Antigen on Protein and DNA Synthesis in Antibody-Forming Cells. Sohei Shinka and Jonathan W. Uhr 300
Leukemia L 1210 Homograft in Swiss Mice: Immunologic, Cellular and Chemotherapeutic Responses. Herbert N. Prince and E. Grunberg 324
A Study of the Kinetics of the Anti-Dinitrophenyl Antibody Response at the Cellular Level. H. Francis Havas and Tomáš Hraba 349

Antibody Formation against 2,4-Dinitrophenyl-Hapten at the Cellular Level. Hemolytic Plaque-in-Gel Assay for Lymphoid Cells Producing Anti-2,4-Dinitrophenyl-Hapten Antibody. Hisashi Yamada and Atsuko Yamada 357

IMMUNOPATHOLOGY

Complement (C'_1)-Coated Red Blood Cells following Infection with the Virus of Equine Infectious Anemia. T. C. McGuire, J. B. Henson and D. Burger 293
Studies on Lymphocyte Transformation in Nephrotoxic Serum Nephritis of the Rat. Hermut Warnatz, Friedrich Scheiffarth and Friedrich Hagel 364

MICROBIAL AND VIRAL IMMUNOLOGY

Cross-Reactions among Group A Streptococci. II. Further Analysis of Antigens Related to Type-Specificity and Protection. Grove G. Wiley and Pauline N. Bruno 149
Assessment of a Bacterial Adherence Colony (BAC) Method for Enumeration of Antibody-Forming Cells to *E. coli* Somatic Antigen. Herman Friedman, Jerry Allen and Maurice Landy 204
Comparative Immune Response to Amphibian Cytoplasmic Viruses Assayed by the Complement-Fixation and Gel Immunodiffusion Tests. Suzanne Kaminski, H Fred Clark and David T. Karzon 260

COMMUNICATIONS

Susceptibility of Chincoteague Ponies to Antigenically Dissimilar Strains of Human Type A2 Influenza Virus. Julius A. Kasel, Robert V. Fulk and Edward W. Harvey 369
Effect of Antimacrophage Serum on Antibody Production and Phagocytosis in Mice. Bertie F. Argyris and Diane H. Plotkin 372
High Efficiency of $SAC1^{sp4sp2sp}$ Conversion to S^* with EDTA-Treated Rat Serum. Yuzo Miyakawa, Teruaki Sekine, Kohkichi Shimada and Kusuya Nishioka 374
The Effect of Decomplementation and Neutrophil Depletion on the Reactivity of a Heat-Stable Homocytotropic Antibody in the Rabbit. K. J. Lindqvist and C. K. Osterland 378
The Use of Affinity Chromatography for the Specific Purification of Antibodies and Antigens. Leon Wofsy and Benjamin Burr 380
Enhancing Antibody. II. Specificity and Heterogeneity. Barry Zimmerman and Joseph D. Feldman 383

NUMBER 3, SEPTEMBER 1969

IMMUNOCHEMISTRY

The Effect of Carbamylation, Amidination and Benzylation on the Ability of Rabbit γG Antibody to Produce Passive Cutaneous Anaphylaxis in Guinea Pig and Rabbit Skin. Stanley Cohen, Lawrence Feinman and Elmer L. Becker 387
The Latency Requirements and Rate of Evolution of Passive Cutaneous Anaphylactic Reactions Produced by Untreated and Carbamylated Rabbit γG Antibody. Lawrence Feinman, Stanley Cohen and Elmer L. Becker 395
Non-Complement-Fixing IgM Antibodies in the Guinea Pig. William D. Linscott and Stephen S. Hansen 423
The Immunoglobulins of Equine Colostrum and Parotid Fluid. Robert J. Genco, Lewis Yecies and Fred Karush 437
Immunoglobulin E in the Monkey. Kimishige Ishizaka, Teruko Ishizaka and Tomio Tada 445
Protein A from *Staphylococcus aureus*. IX. Complement-Fixing Activity of Protein A-IgG Complexes. J. Sjöquist and G. Stålenheim 467
Complement: Chemical Coupling of a Functionally Active Component to Erythrocytes in the Absence of Antibody. William D. Linscott, W. Page Faulk and Philip J. Perucca 474
Quantitative Studies of the Specificity of Anti-Pneumococcal Antibodies, Types III and VIII. IV. Binding of Labeled Hexasaccharides Derived from S3 by Anti-S3 Antibodies and Their Fab Fragments. Moshe Katz and A. M. Pappenheimer, Jr. 491
Immunologic and Immunochemical Studies on the Gar, *Lepisosteus platyrhincus*. I. Immune Responses and Characterization of Antibody. Claire M. Bradshaw, L. William Clem and M. Michael Sigel 496

The Specificity of the Early Immune Response. I. A Comparison of the Specificity of Delayed Hypersensitivity and Humoral Responses following Immunization with Human γG Globulin. Christopher S. Henney 519
Multi-Compartment Distribution Analysis of Antibrain Radioantibodies in Density Gradients. Eugene D. Day and Sylvester Lassiter 550
Immunoglobulins of the Rhesus Monkey (*Macaca mulatta*). IV. Characteristics of the Primary and Secondary Responses of the Rhesus Monkey to Heterologous Serum Protein Antigens. James D. Lakin, Roy Patterson and Jacob J. Pruzansky 577
Immune Mechanisms of Reversed Type Reaginic Hypersensitivity. Kimishige Ishizaka and Teruko Ishizaka 588
Differentiation of Human IgM Subclasses by the Ability to Interact with a Factor Resembling the First Component of Complement. Malcolm R. Mackenzie, Noel L. Warner, William D. Linscott and H. Hugh Fudenberg 607

IMMUNOGENETICS

The Effect of the Amount of Mycobacterial Adjuvants on the Immune Response of Strain 2, Strain 13 and Hartley Strain Guinea Pigs to DNP-PLL and DNP-GL. Ira Green, Baruj Benacerraf and Sanford H. Stone 403
Differences between Populations of Fresh Water Catfish Defined by Blood Group Antigens and Antibodies. William J. Kuhns, Ross F. Nigrelli and Joseph V. Chuba 454

CELLULAR IMMUNOLOGY

Regenerative Potential of Immunocompetent Cells. III. Recovery of Primary Antibody-Forming Potential from X-Irradiation. The Role of the Thymus. P. Nettesheim, M. L. Williams and Anna S. Hammons 505
Effects of Radiation on the Initial and Anamnestic IgM Hemolysin Responses in Rabbits; Antigen Injection after X-Rays. William H. Taliaferro and Lucy Graves Taliaferro 550
Factors in Delayed Sensitivity: Lymphocyte and Macrophage Cytotoxins in the Tuberculin Reaction. E. R. Heise and R. S. Weiser 570

IMMUNOPATHOLOGY

A Neutrophil Chemotactic Factor Derived from C'5 upon Interaction of Guinea Pig Serum with Endotoxin. R. Snyderman, H. S. Shin, J. K. Phillips, H. Gewurz and S. E. Mergenhagen 413
Persistence of the Autoimmune Pathogenetic Process in Experimental Autologous Immune Complex Nephritis. Thomas S. Edgington, Sun Lee and Frank J. Dixon 528
Prolonged Bursal Lymphocyte Depletion and Suppression of Antibody Formation following Irradiation of the Bursa of Fabricius. W. T. Weber and W. P. Weidanz 537
Rabbit Autoantibodies to Aorta. Hans W. Intorp and Felix Milgrom 544
Distribution Analysis of Brain-Localized Radioantibodies after Zonal Ultracentrifugation in a Sucrose Density-Gradient. Eugene D. Day and Lewis C. Rigsbee 556

MICROBIAL AND VIRAL IMMUNOLOGY

Specific Role of Each Human Leukocyte Type in Viral Infections. III. 17D Yellow Fever Virus Replication and Interferon Production in Homogeneous Leukocyte Cultures Treated with Phytohemagglutinin. E. Frederick Wheelock and Robert Edelman 429
Immunosuppression by Leukemia Viruses. III. Adoptive Transfer of Antibody-Forming Cells to Friend Disease Virus-Infected Mice. Walter S. Ceglowski and Herman Friedman 460
Particulate and Soluble Antigens of *Rickettsia tsutsugamushi* in the Complement Fixation Test. Akira Shishido, Michiko Hikita, Takeshi Sato and Seiya Kohno 480
Mechanism of Bacteriophage T4 Neutralization by Rabbit Immunoglobulin and Its Proteolytic Digestion Fragments. G. W. Stemke 596

COMMUNICATIONS

Production of Anti-Hapten Antibodies by Several Classes of Lower Vertebrates. Gerrie A. Leslie and L. William Clem 613
Ultrastructural Identification of Possible Sites of Antigen Processing in Macrophages. Phillip J. Catanzaro, Richard C. Graham, Jr. and Howard J. Schwartz 618

Insoluble Immunoadsorbents Containing Anti-IgE: Removal of Reaginic Activity and Subsequent Elution. K. Ito, K. Wicher and C. E. Arbesman 622
Determination of Antibody-Hapten Equilibrium Constants by an Ammonium Sulfate Precipitation Technique. Yehudit Stupp, Takeshi Yoshida and William E. Paul 625

NUMBER 4, OCTOBER 1969

IMMUNOCHEMISTRY

$7S\gamma_1$, $7S\gamma_2$ and Igm Immunoglobulins in the Deer Mouse (*Peromyscus maniculatus*). John E. Coe .. 639
Model Systems for the Study of Drug Hypersensitivity. I. The Specificity of the Rabbit Anti-Aspiryl System. Donald R. Hoffman and Dan H. Campbell 655
Protein-Carbohydrate Interaction. XIX. The Interaction of Concanavalin A with IgM and the Glycoprotein Phytohemagglutinins of the Waxbean and the Soybean. I. J. Goldstein, Lucy L. So, Yvonne Yang and Q. C. Callies 695
Studies on the Immunochemical Properties of Aggregates and Subunits of Fc of Rabbit γG Globulins. Kenneth Amiraian and Zoltan Ovary 716
Immunoenzymology of AMP-Deaminase. Donald Selig and Oscar P. Chilson 725
Passive Cutaneous Anaphylactic and Schultz-Dale Reactions Elicited in Guinea Pigs by Chemically Univalent Dinitrophenyl-Derivatives of Bacitracin A and Papain. Domenico Mancino, Robert E. Tigelaar and Zoltan Ovary 750
Effect of 2-Mercaptoethanol on 7S Rabbit Antibodies to Various Homologous and Heterologous Antigens. Constance E. Brinckerhoff, Robert C. Brown and Noel R. Rose 757
Varying Specificity of Systemic Lupus Erythematosus Sera for Histone Fractions and a Periodate-Sensitive Antigen Associated with Histone. B. David Stollar 804
The Binding Reactions of Antibodies Specific for the 2,6-Dinitrophenyl Group. J. Russell Little, Wayne Border and Ralph Freidin 809
Differences in Anti-Protein A Activity among IgG Subgroups. Göran Kronvall and Ralph C. Williams, Jr. 828

IMMUNOGENETICS

Allotype Suppression with Anti-b5 Antiserum in b^4b^5 Homozygous Rabbits Fostered in Uteri of b^4b^4 Homozygous Mothers: Compensation by Allotypes at Other Loci. John L. Vice, William L. Hunt and Sheldon Dray 629
Identification and Genetic Control of the f4 and f5 Rabbit γA Immunoglobulin Allotypes. Phenogroups at the *f* Locus. Thomas P. Conway, Sheldon Dray and Edward A. Lichter 662

CELLULAR IMMUNOLOGY

Studies on Heterologous Antilymphocyte and Antithymocyte Sera. IV. Further Evidence for a Preferential Effect on Antigen-Sensitive Cells. Rolf F. Barth 648
Recruitment and Proliferation of Immunocompetent Cells during the Log Phase of the Primary Antibody Response. Eugene H. Perkins, Toshihiko Sado and T. Makinodan 668
Gamma Globulin Synthesis in Mixed Cultures of Allogeneic Lymphoid Cells. R. V. Petrov and A. A. Mikhailova 679
Ontogenesis of Immune Capability of Murine Bone Marrow Cells and Spleen Cells against Transplantation Antigens. Mortimer M. Bortin, Alfred A. Rimm and Edward C. Saltzstein 683
Effects of Antithymus Serum on Thymic Lymphopoiesis: A Radioautographic Study. Hiroshi Nagaya and Herbert O. Sieker 778
Isoenzyme Differences between a Human Diploid Cell Line, WI-38, and SV_{40}-Transformed WI-38. Eleanor M. Bartholomew, William R. Bartholomew and Noel R. Rose 787
Impaired Activation of Thymus Lymphocytes by Phytohemagglutinin. D. R. Forsdyke 818
Immunoglobulin Production in Synchronized Cultures of Human Hematopoietic Cell Lines. I. Variation of Cellular Immunoglobulin Level with the Generation Cycle. M. Takahashi, Y. Yagi, G. E. Moore and D. Pressman 834

IMMUNOPATHOLOGY

Enhanced Humoral Immunity in Mice Infected with Attenuated Venezuelan Equine Encephalitis Virus. R. J. Howard, C. P. Craig, G. S. Trevino, S. F. Dougherty and S. E. Mergenhagen 699

Spontaneous Thyroiditis in the Obese Strain of Chickens. I. Demonstration of Circulating Autoantibodies. Ernest Witebsky, Joseph H. Kite, Jr., Georg Wick and Randall K. Cole..... 708
Immunofluorescence Studies on the Anatomic Distribution of the Soluble Antigen Responsible for the Production of Nephrotoxic Serum Nephritis. Toshihiko Nagasawa and Seiichi Shibata 736
Experimental Murine Amyloid. IV. Amyloidosis and Immunoglobulins. James T. Willerson, Richard Asofsky and Werner F. Barth..... 741
Reaginic Type of Antibody in Mice Stimulated by Extracts of *Bordetella pertussis*. C. R. Clausen, J. Munoz and R. K. Bergman..... 768
Studies of Cyclophosphamide Suppression of Experimental Allergic Encephalomyelitis in Wistar Rats. Philip Y. Paterson and Margaret A. Hanson..... 795

MICROBIAL AND VIRAL IMMUNOLOGY

In Vitro Immune Responses of Rabbits with Persistent Adenovirus Type 5 Infection. Rhoda A. Reddick and Stanley S. Lefkowitz..... 687
Immunosuppression by Antigen-Associated Human Serum Alpha-One Protein. H. Y. Whang, D. Chun and E. Neter..... 824
Induction of Delayed Hypersensitivity to Influenza and Mumps Viruses in Mice. Stephen M. Feinstone, Edwin H. Beachey and Michael W. Rytel..... 844
Studies on the Neutralization of Japanese Encephalitis Virus. II. Variations in Reaction Properties of Virus to Antibody during Replication in PS Cell Cultures. Yoshikatsu Ozaki and Keiko Kumagai..... 850
